## Admission to Degree Program

Enrollment in the School of Music's degree programs is limited. Prospective majors must pass an audition and aural skills exam. Please consult the General Information section below and visit the college advisement center for details.

## The Discipline

The School of Music celebrates musical artistry and understanding as core elements of the human experience, crucial components of a liberal education, and central aspects of a spiritual life.

In the School of Music, students learn self-expression and self-discipline through rigorous practice and passionate performance. They develop an acute sensitivity for collaboration and artistic cooperation through intensive ensemble work. In the study of music theory and history, students learn to hear and appreciate various musical languages, distinguish nuances of style, and discern the connections between musical developments and their cultural contexts.

Students learn in a variety of situations: private lessons, small seminars, multimedia labs, ensembles, recitals, and lectures. They are encouraged to participate actively in the vibrant musical environment of the School of Music by attending concerts, lectures, and workshops, and by contributing to a student culture of independently motivated artistic engagement. These experiences foster a holistic approach that embraces academic rigor, artistic intuition, creative ambition, physical grace, and expressive eloquence.

In pursuit of the University's spiritual aims, students learn the divinity inherent in creativity and the devotion expressed by the nurturing of one's craft.

## Career Opportunities

The School of Music leads its students toward careers in performance, studio teaching, music education, creating and managing music projects for the media, recording and sound technology, arts management, music journalism, composition, and other music-related professions. Because the music curriculum is rigorous, it is also an excellent pre-professional course of study for those interested in fields as diverse as law, business, library science, or medicine. Whatever degrees one obtains, however, an education in music pertains not only to earning a living through art but also using art to enhance one's satisfaction and joy in life.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

## Graduate Programs and Degrees

MA in Music
MM in Music

For more information see the BYU 2014–2015 Graduate Catalog.

## General Information

1. Admission applications to the School of Music must be received by January 15 (or December 1 for violinists and classical vocalists).

2. All entering students (including transfer students) must pass a performance audition on their major instrument (or voice). Live auditions are held on the last Saturday of January. Students who cannot attend the live audition must submit an audio or video recording for consideration; these recordings must be received by January 15. See the School of Music office (C-550 HFAC) for further details regarding the audition process and requirements, or call (801) 422-8903.

3. All entering students must also pass an aural skills examination. They may take this examination in one of three ways: (1) in a group, at admissions auditions on the last Saturday of January; (2) individually, at the BYU Testing Center (call [801] 422-6147 to schedule times), or (3) individually by proctor at other locations (only if you are NOT coming to campus for a live audition; you live outside of Utah County; and you are unable to come to BYU campus and take the test in the Testing Center. Call the School of Music office to arrange). Students may take the exam as many times as desired to improve their score. (Students who receive a score of 4 or 5 on the aural part of the AP music exam are exempt from this test.)

4. All students who do not have a keyboard emphasis (piano or organ) must complete the piano proficiency requirement by the end of the sophomore year. Students can fulfill this requirement by (1) taking one or both of Music 221, 222, or by (2) taking the Piano Proficiency Exam. (Call the School of Music for more details.)

5. Upon acceptance as a music major, each student must meet with their academic advisor in the college advisement center.

6. Students who pass either part of the AP Music Test with at least a score of 4 should check with the college advisement center before registering for core courses.

7. All major performance instruction must be in the same instrument (or voice).

8. All students registered in Music 161, 250R, 260R, 360R, or 460R must complete an examination before a faculty jury on their major instrument (or voice) near the end of each semester of performance study. (With the approval of the faculty, students may elect to substitute a juried public recital for a jury examination.) Students wanting to enter Music 360R or 460R (normally after the sophomore year) must first be granted approval to do so by a faculty jury.

9. All students must fulfill the ensemble requirements of their individual degree programs as described below. Ensemble requirements are filled through a mixture of assigned "Category 1: Approved Large Ensembles" (Music 311R [University Chorale] if placed by audition, 312R [Men's Chorus], 313R [Women's Chorus], 314R [Concert Choir], 315R [University Singers], 325R [Symphonic Band], 326R [Wind Symphony], 337R [Symphony Orchestra], and 338R [Philharmonic Orchestra]) and "Category 2: Other Ensembles Approved for the Major," as allowed in each degree program. Only one approved large ensemble per semester may count toward this requirement, and this ensemble assignment is determined by the student's major instrumental teacher or by choral audition, not by the student. The total ensemble requirement should be completed in consecutive semesters of enrollment beginning the freshman year. Students may not enroll in more than two conducted or directed ensembles per semester.

10. All transfer students must have their previous university work in music evaluated by the appropriate BYU School of Music faculty members to determine what credits will be accepted in the transfer (see the college advisement center for referrals). We subscribe to the policy of the National Association of Schools of Music and carry no obligation to accept upper-division music credits from other member schools.

11. If a School of Music student receives an E grade twice in any one course within his or her major, s/he will not be allowed to proceed in the major. Also, a registration hold will be placed on the student's records pending a meeting with an academic advisor to determine an alternative plan of study. Only in rare and extreme cases will the School of Music consider petitions to take a course a third time and have major status reinstated.

12. Students temporarily leaving the School of Music for a mission are required to file a deferment form with the university's Admissions Office and notify the School of Music Admissions Assistant of their intent to defer. Students intending to enter the School of Music during the school year immediately following mission service are highly encouraged to apply and audition for admission to the School of Music (see #1-3) prior to departure.

13. All School of Music students are expected to attend at least eight concerts and two School of Music-sponsored lectures each semester. For more information, see the "Undergraduate Handbook" published online by the School of Music.

5. Complete 4 hours of the following:

MUSIC 360R : Performance Instruction. (.5-2:1:1)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Music major status; jury approval.
DESCRIPTION: Private instruction and studio class.
NOTE: From one to four hours of daily practice. Fee.

**Course Outcomes**

- Students will learn how to improve their technical facility and artistic expression in their chosen area of musical study.

6. Complete one hour of ensemble each semester for four semesters, including 2-3 hours from Category 1: Approved Large Ensembles (see General Information) and 1-2 hours from the following Category 2 ensembles:

MUSIC 316R : Opera Workshop. (1:6:0)

WHEN TAUGHT: Fall
PREREQUISITE: Audition and instructor's consent.
DESCRIPTION: Training and experience in operatic choral music and stage movement.

**Course Outcomes**

- Students will learn the performance techniques required to sing art songs and operatic arias from the western classical vocal traditions.
- Students will apply these skills in the performance of songs or arias in the class.

MUSIC 317R : Opera Ensemble. (.5-3:6:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Audition and instructor's consent.
DESCRIPTION: Training and experience in operatic excerpts, chamber opera, and full productions for operatic soloists.

**Course Outcomes**

- Through performance opportunities before an audience, students will demonstrate a more comprehensive understanding of the basic skills taught in the Opera Workshop course (See Learning Outcomes for the respective courses; Mus 316R and 616R).

MUSIC 318R : Music Theatre Ensemble. (1:0:5)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Audition and instructor's consent.
DESCRIPTION: Auditioned chorus or orchestra for opera or music dance theatre productions.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 320R : Young Ambassadors. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition and director's consent.
DESCRIPTION: Participation as soloists, coaches, or directors in music dance theatre performances.

**Course Outcomes**

- Students will explore the Music Dance Theatre tradition of America as they learn song and dance sequences from the American Songbook.
- Students will progress in their level of proficiency in dance and singing through intensive rehearsal and frequent performance opportunities.
- Students will serve in the community, in public schools, and with service organizations nationally and internationally to build bridges of understanding between cultures and peoples.

MUSIC 323R : Marching Band. (1:0:6)

WHEN TAUGHT: Fall
PREREQUISITE: Audition or director's consent.

**Course Outcomes**

- As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend, and correct marching execution. Students should be able to demonstrate application of these principles by successfully performing college-level marching band repertoire in rehearsal and performances.

MUSIC 330R : Steel Band. (1:0:2)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and

Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on "groove" music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that "groove".

MUSIC 331R : Jazz Combos. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- Students will learn how to function in a traditional jazz combo setting, including learning head charts, standard lead sheet tunes, and arrangements. They will also further their knowledge of and experience in improvising in a typical professional performance setting in a variety of jazz styles.

MUSIC 332R : Show Band. (1:0:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Contemporary and traditional show music (Young Ambassadors) and ethnic music (Living Legends).

**Course Outcomes**

No outcomes are available at this time.

MUSIC 333R : Jazz Ensemble. (1:1:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Audition.

DESCRIPTION: Includes Jazz Ensemble (big band), Jazz Lab Band (entry-level big band), and Vocal Jazz Ensembles.

**Course Outcomes**

- Students will learn how to perform in a traditional big band setting. Standard and representative repertoire from the various jazz styles will be taught and explored in this course.

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Playing and performing on the Balinese gamelan (percussion) instruments.

**Course Outcomes**

- Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.
- Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this musicâ s profound contribution to the life experience.
- In the spirit of BYUâ s global mission and the breadth of educational experience advocated in BYUâ s guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

MUSIC 339R : Chamber Orchestra. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- The Chamber Orchestra seeks to discover the truth imbedded in the greatest works for chamber orchestra through study, preparation, and performance, both for its own musicians and for audiences who hear them. The orchestra bears the responsibility of representing the School of Music, the University, and the Church through regional, national, and international tours.

MUSIC 341R : Brass Chamber Music. (1:1:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will demonstrate the ability to perform standard chamber ensemble music at an appropriate artistic level for their year of study.

: Brass Ensemble.

**Course Outcomes**

: Brass Choir.

**Course Outcomes**

: Trombone Choir.

**Course Outcomes**

MUSIC 342R : Early Music Ensemble. (1:1:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 343R : Guitar Ensemble. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will gain ensemble experience with other guitarists, develop better sight-reading skills, and perform in a formal setting during the semester.

MUSIC 344R : Keyboard in Ensemble. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Music 260R or instructor's consent.
DESCRIPTION: Accompanying and ensemble performance.

**Course Outcomes**

- Skills to Develop in 344r:Understand how to best balance their playing with another instrument and comprehend how that balance evolves to meet the needs of different instruments.2. Understand how to communicate musical ideas through body language.3.Develop musical “ESP”. This is achieved when a pianist works with the same person over a long period of time, and develops better sensitivity. The pianist and soloist can sense changes in tempi, phrasing, and dynamics through concentrated listening, needing almost no visual contact. 4.Understand the subtext of the score.5. Develop a genuine appreciation for the art of the accompanist.

MUSIC 345R : Percussion Ensemble. (1:0:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.

MUSIC 346R : String Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Instructor's consent.

**Course Outcomes**

- There are four main areas of student outcomes important for this course: the building of repertoire, experience performing, exploring the enormous variety of timbre and color in the chamber music setting, and artistically improving how you communicate musically with your performing colleagues, as well as your audience.

MUSIC 347R : Vocal Point. (1:5:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- The desired outcome of vocal point is to represent the School of Music and BYU to the World with a high degree of artistry and capturing the personality of our campus, through the medium of male a cappella choral music.

MUSIC 348R : Woodwind Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will demonstrate performance proficiency on their instrument within the context of woodwind chamber music.

: Woodwind Ensemble.

**Course Outcomes**

: Saxophone Ensemble.

**Course Outcomes**

: Flute Choir.

**Course Outcomes**

MUSIC 441R : New Music Ensemble. (1:0:1)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Instructor's consent.

**Course Outcomes**

- Performance practice in modern and experimental musical vocabularies.

7. Complete the following upper-division music core courses:
MUSIC 301 : Survey of Music Literature 1. (2:3:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.

DESCRIPTION: Survey of musical genres, forms, styles, and performance practices from antiquity to the Enlightenment.

**Course Outcomes**

There are no course outcomes available

MUSIC 302 : Survey of Music Literature 2. (2:2:0)

MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: C- or higher in Music 293, 295.

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

8. Complete the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Exploration of music making from a global perspective.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of

tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists
- Learn to transcribe and analyze jazz solos

9. Complete one course from a GE Arts or Letters requirement outside music (in addition to the GE requirement) or one humanities course approved by faculty advisor.
10. Complete a minimum of six credits from the following music elective courses. Select courses in consultation with faculty advisor.

MUSIC 286 : Introduction to the Music Business. (2:2:0)

WHEN TAUGHT: Winter

5. Complete one hour of ensemble each semester for four semesters, including 2-3 hours from Category 1: Approved Large Ensembles (see General Information) and 1-2 hours from the following Category 2 ensembles:

MUSIC 316R : Opera Workshop. (1:6:0)

WHEN TAUGHT: Fall

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Training and experience in operatic choral music and stage movement.

**Course Outcomes**

- Students will learn the performance techniques required to sing art songs and operatic arias from the western classical vocal traditions.
- Students will apply these skills in the performance of songs or arias in the class.

MUSIC 317R : Opera Ensemble. (.5-3:6:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Training and experience in operatic excerpts, chamber opera, and full productions for operatic soloists.

**Course Outcomes**

- Through performance opportunities before an audience, students will demonstrate a more comprehensive understanding of the basic skills taught in the Opera Workshop course (See Learning Outcomes for the respective courses; Mus 316R and 616R).

MUSIC 318R : Music Theatre Ensemble. (1:0:5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Auditioned chorus or orchestra for opera or music dance theatre productions.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 320R : Young Ambassadors. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition and director's consent.

DESCRIPTION: Participation as soloists, coaches, or directors in music dance theatre performances.

**Course Outcomes**

- Students will explore the Music Dance Theatre tradition of America as they learn song and dance sequences from the American Songbook.
- Students will progress in their level of proficiency in dance and singing through intensive rehearsal and frequent performance opportunities.
- Students will serve in the community, in public schools, and with service organizations nationally and internationally to build bridges of understanding between cultures and peoples.

MUSIC 323R : Marching Band. (1:0:6)

WHEN TAUGHT: Fall

PREREQUISITE: Audition or director's consent.

**Course Outcomes**

- As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend, and correct marching execution. Students should be able to demonstrate application of these principles by successfully performing college-level marching band repertoire in rehearsal and performances.

MUSIC 330R : Steel Band. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on “groove” music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that “groove”.

MUSIC 331R : Jazz Combos. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

Students will learn how to function in a traditional jazz combo setting, including learning head charts, standard lead sheet tunes, and arrangements. They will also further their knowledge of and experience in improvising in a typical professional performance setting in a variety of jazz styles.

MUSIC 332R : Show Band. (1:0:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Contemporary and traditional show music (Young Ambassadors) and ethnic music (Living Legends).

**Course Outcomes**

No outcomes are available at this time.

MUSIC 333R : Jazz Ensemble. (1:1:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Audition.

DESCRIPTION: Includes Jazz Ensemble (big band), Jazz Lab Band (entry-level big band), and Vocal Jazz Ensembles.

**Course Outcomes**

- Students will learn how to perform in a traditional big band setting. Standard and representative repertoire from the various jazz styles will be taught and explored in this course.

: Jazz Lab Band.

**Course Outcomes**

: Vocal Jazz Ensemble.

**Course Outcomes**

(Vocal Jazz or Jazz Ensemble)

MUSIC 334R : Synthesis. (1:0:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- Students will learn to perform in a traditional big band setting. Music will be selected from the standard and representative repertoire of jazz styles.

MUSIC 335R : Jazz Legacy Band. (1:2:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Traditional ensemble specializing in early jazz. Band occasionally tours off campus.

**Course Outcomes**

- Students will perform traditional jazz, improvising within the traditional jazz tutti texture. Each student will demonstrate the roll of his or her instrument within the context of traditional jazz.
- Each student will improvise solos in the style of the early jazz masters who play his or her instrument.
- Students will play typical introductions, endings, solo backgrounds, texture routines characteristic of traditional jazz styles
- Students will demonstrate the ability to play 25 "Dixieland Standards." These are among the most commonly performed tunes that are played by professional "Dixieland" bands at casual performance engagements (gigs).Standard tunes: AvalonBasin Street BluesBig Butter and Egg ManBlack and BlueBourbon Street ParadeDo You Know What it MeansHigh Society I Can't Give You Anything But LoveI Found A New BabyIndiana (Back Home Again in)Ja DaJust A Closer Walk With TheeMuskrat RambleRoyal Garden BluesSt. James InfirmarySt. Louis BluesStruttin' With Some BarbecueSweet Georgia BrownThat's A PlentyTin Roof BluesTwelfth Street RagUp a Lazy RiverWhen the Saints Go Marching InWhen You're Smiling Won't You Come Home Bill Bailey

MUSIC 336R : Balinese Gamelan. (1:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Playing and performing on the Balinese gamelan (percussion) instruments.

**Course Outcomes**

- Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.
- Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this musicâ s profound contribution to the life experience.
- In the spirit of BYUâ s global mission and the breadth of educational experience advocated in BYUâ s guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

MUSIC 339R : Chamber Orchestra. (1:0:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Audition.

**Course Outcomes**

- The Chamber Orchestra seeks to discover the truth imbedded in the greatest works for chamber orchestra through study, preparation, and performance, both for its own musicians and for audiences who hear them. The orchestra bears the responsibility of representing the School of Music, the University, and the Church through regional, national, and international tours.

MUSIC 341R : Brass Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will demonstrate the ability to perform standard chamber ensemble music at an appropriate artistic level for their year of study.

: Brass Ensemble.

**Course Outcomes**

: Brass Choir.

**Course Outcomes**

: Trombone Choir.

**Course Outcomes**

MUSIC 342R : Early Music Ensemble. (1:1:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 343R : Guitar Ensemble. (1:1:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will gain ensemble experience with other guitarists, develop better sight-reading skills, and perform in a formal setting during the semester.

MUSIC 344R : Keyboard in Ensemble. (1:0:3)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Music 260R or instructor's consent.
DESCRIPTION: Accompanying and ensemble performance.

**Course Outcomes**

- Skills to Develop in 344r:Understand how to best balance their playing with another instrument and comprehend how that balance evolves to meet the needs of different instruments.2. Understand how to communicate musical ideas through body language.3.Develop musical “ESP”. This is achieved when a pianist works with the same person over a long period of time, and develops better sensitivity. The pianist and soloist can sense changes in tempi, phrasing, and dynamics through concentrated listening, needing almost no visual contact. 4.Understand the subtext of the score.5. Develop a genuine appreciation for the art of the accompanist.

MUSIC 345R : Percussion Ensemble. (1:0:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.

MUSIC 346R : String Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Instructor's consent.

**Course Outcomes**

- There are four main areas of student outcomes important for this course: the building of repertoire, experience performing, exploring the enormous variety of timbre and color in the chamber music setting, and artistically improving how you communicate musically with your performing colleagues, as well as your audience.

MUSIC 347R : Vocal Point. (1:5:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**
- The desired outcome of vocal point is to represent the School of Music and BYU to the World with a high degree of artistry and capturing the personality of our campus, through the medium of male a cappella choral music.

MUSIC 348R : Woodwind Chamber Music. (1:1:2)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: MUSIC 194
DESCRIPTION: Beginning improvisation: theory and technique.

**Course Outcomes**

- Students will learn the fundamentals of jazz improvisation and how to apply them in a performance environment. Such fundamentals will include blues scales and chord progressions, typical jazz chord progressions, melodic patterns for improvisation adn others.

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this major.*

The BM in composition degree program teaches young composers to write with modern and experimental music vocabularies as well as historic vocabularies, write for diverse color combinations (including orchestral and electroacoustic), and recruit and rehearse players to perform their music.

The music composition major prepares the student for graduate study in composition and theory or may lead to a professional career in composing, arranging, or related fields.

(6 hours).

5. Complete one hour of ensemble each semester for four semesters, including 2-3 hours from Category 1: Approved Large Ensembles (see General Information) and 1-2 hours from the following Category 2 ensembles:

MUSIC 316R : Opera Workshop. (1:6:0)

WHEN TAUGHT: Fall

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Training and experience in operatic choral music and stage movement.

**Course Outcomes**

- Students will learn the performance techniques required to sing art songs and operatic arias from the western classical vocal traditions.
- Students will apply these skills in the performance of songs or arias in the class.

MUSIC 317R : Opera Ensemble. (.5-3:6:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Training and experience in operatic excerpts, chamber opera, and full productions for operatic soloists.

**Course Outcomes**

- Through performance opportunities before an audience, students will demonstrate a more comprehensive understanding of the basic skills taught in the Opera Workshop course (See Learning Outcomes for the respective courses; Mus 316R and 616R).

MUSIC 318R : Music Theatre Ensemble. (1:0:5)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Audition and instructor's consent.

DESCRIPTION: Auditioned chorus or orchestra for opera or music dance theatre productions.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 320R : Young Ambassadors. (.5-3:0:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition and director's consent.

DESCRIPTION: Participation as soloists, coaches, or directors in music dance theatre performances.

**Course Outcomes**

- Students will explore the Music Dance Theatre tradition of America as they learn song and dance sequences from the American Songbook.
- Students will progress in their level of proficiency in dance and singing through intensive rehearsal and frequent performance opportunities.
- Students will serve in the community, in public schools, and with service organizations nationally and internationally to build bridges of understanding between cultures and peoples.

MUSIC 323R : Marching Band. (1:0:6)

WHEN TAUGHT: Fall

PREREQUISITE: Audition or director's consent.

**Course Outcomes**

- As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend, and correct marching execution. Students should be able to demonstrate application of these principles by successfully performing college-level marching band repertoire in rehearsal and performances.

MUSIC 330R : Steel Band. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on “groove” music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that “groove”.

MUSIC 331R : Jazz Combos. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- Students will learn how to function in a traditional jazz combo setting, including learning head charts, standard lead sheet tunes, and arrangements. They will also further their knowledge of and experience in improvising in a typical professional performance setting in a variety of jazz styles.

MUSIC 332R : Show Band. (1:0:6)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Contemporary and traditional show music (Young Ambassadors) and ethnic music (Living Legends).

**Course Outcomes**

MUSIC 334R : Synthesis. (1:0:4)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- Students will learn to perform in a traditional big band setting. Music will be selected from the standard and representative repertoire of jazz styles.

MUSIC 335R : Jazz Legacy Band. (1:2:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

DESCRIPTION: Traditional ensemble specializing in early jazz. Band occasionally tours off campus.

**Course Outcomes**

- Students will perform traditional jazz, improvising within the traditional jazz tutti texture. Each student will demonstrate the roll of his or her instrument within the context of traditional jazz.
- Each student will improvise solos in the style of the early jazz masters who play his or her instrument.
- Students will play typical introductions, endings, solo backgrounds, texture routines characteristic of traditional jazz styles
- Students will demonstrate the ability to play 25 "Dixieland Standards." These are among the most commonly performed tunes that are played by professional "Dixieland" bands at casual performance engagements (gigs).Standard tunes: AvalonBasin Street BluesBig Butter and Egg ManBlack and BlueBourbon Street ParadeDo You Know What it MeansHigh Society‌ I Can't Give You Anything But Love‌

MUSIC 336R : Balinese Gamelan. (1:2:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Playing and performing on the Balinese gamelan (percussion) instruments.

**Course Outcomes**

- Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.
- Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this musicâ s profound contribution to the life experience.
- In the spirit of BYUâ s global mission and the breadth of educational experience advocated in BYUâ s guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

MUSIC 339R : Chamber Orchestra. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- The Chamber Orchestra seeks to discover the truth imbedded in the greatest works for chamber orchestra through study, preparation, and performance, both for its own musicians and for audiences who hear them. The orchestra bears the responsibility of representing the School of Music, the University, and the Church through regional, national, and international tours.

MUSIC 341R : Brass Chamber Music. (1:1:2)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will demonstrate the ability to perform standard chamber ensemble music at an appropriate artistic level for their year of study.

: Brass Ensemble.

**Course Outcomes**

: Brass Choir.

**Course Outcomes**

: Trombone Choir.

**Course Outcomes**

MUSIC 342R : Early Music Ensemble. (1:1:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

No outcomes are available at this time.

MUSIC 343R : Guitar Ensemble. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students will gain ensemble experience with other guitarists, develop better sight-reading skills, and perform in a formal setting during the semester.

MUSIC 344R : Keyboard in Ensemble. (1:0:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music 260R or instructor's consent.

DESCRIPTION: Accompanying and ensemble performance.

**Course Outcomes**

- Skills to Develop in 344r:Understand how to best balance their playing with another instrument and comprehend how that balance evolves to meet the needs of different instruments.2. Understand how to communicate musical ideas through body language.3.Develop musical "ESP". This is achieved when a pianist works with the same person over a long period of time, and develops better sensitivity. The

pianist and soloist can sense changes in tempi, phrasing, and dynamics through concentrated listening, needing almost no visual contact. 4.Understand the subtext of the score.5. Develop a genuine appreciation for the art of the accompanist.

MUSIC 345R : Percussion Ensemble. (1:0:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**
- To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.

MUSIC 346R : String Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Instructor's consent.

**Course Outcomes**
- There are four main areas of student outcomes important for this course: the building of repertoire, experience performing, exploring the enormous variety of timbre and color in the chamber music setting, and artistically improving how you communicate musically with your performing colleagues, as well as your audience.

MUSIC 347R : Vocal Point. (1:5:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**
- The desired outcome of vocal point is to represent the School of Music and BYU to the World with a high degree of artistry and capturing the personality of our campus, through the medium of male a cappella choral music.

MUSIC 348R : Woodwind Chamber Music. (1:1:2)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Director's consent.

**Course Outcomes**
- Students will demonstrate performance proficiency on their instrument within the context of woodwind chamber music.

: Woodwind Ensemble.

**Course Outcomes**

: Saxophone Ensemble.

**Course Outcomes**

: Flute Choir.

**Course Outcomes**

MUSIC 441R : New Music Ensemble. (1:0:1)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Instructor's consent.

**Course Outcomes**
- Performance practice in modern and experimental musical vocabularies.

6. Complete the following upper-division music core courses:

MUSIC 301 : Survey of Music Literature 1. (2:3:0)
WHEN TAUGHT: Fall; Winter

WHEN Fall; Winter; Spring Contact Department

TAUGHT:
PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 and 202, or equivalent.
DESCRIPTION: Survey of musical genres, forms, styles, and performance practices in the 18th and 19th centuries.

**Course Outcomes**

There are no course outcomes available

MUSIC 303 : Survey of Music Literature 3. (2:2:0)

WHEN TAUGHT: Fall; Winter; Summer Contact Department
PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.
DESCRIPTION: Survey of music genres, forms, styles, and performance practices from the late Romantic era to the present.

**Course Outcomes**

There are no course outcomes available

MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: C- or higher in Music 293, 295.
DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

7. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

# BM in Music Education: K–12 Choral Emphasis (87 hours, including licensure hours)

Show All Course Descriptions
Hide All Course Descriptions

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.*

A degree in music education prepares the student for K-12 licensure as a public school music teacher with a choral emphasis. The degree program is a composite of music and education. Graduates may obtain a teaching position, pursue graduate work, or use the degree as professional preparation for other fields of endeavor.

# BM in Music Education: K–12 Instrumental Emphasis (92 hours, including licensure hours)

Show All Course Descriptions
Hide All Course Descriptions

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.*

A degree in music education prepares the student for K-12 licensure as a public school music teacher with a instrumental emphasis. The degree program is a composite of music and education. Graduates may obtain a teaching position, pursue graduate work, or use the degree as professional preparation for other fields of endeavor.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center and enroll in Music 176 winter semester or summer term. This course is prerequisite to official acceptance into music education.
2. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
3. Proficiency requirements: Present a juried recital (Music 349) in the last semester of private instruction. Students must prepare a minimum of 25 minutes of music to be performed in a formal public recital. Students will schedule a joint recital with one other music major, or they may present a full recital if encouraged to do so by their major instructor.
4. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: C- or higher in Music 293, 295.
DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

9. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical

practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?

- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

# BM in Music Education: Elementary Music Specialist Emphasis (120 hours*, including licensure hours)

Show All Course Descriptions
Hide All Course Descriptions

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.*

A five-year program, the degree offers a dual major in elementary music education and elementary education. It will also prepare the student for licensure as an elementary classroom teacher and as an elementary music specialist. Graduates may obtain a teaching position in either area or a combination of both, pursue graduate work, or use the degree as preparation for other fields of endeavor.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center for information regarding the application procedure for official acceptance into this degree program and course sequence/map.
2. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
3. Proficiency requirements: Present a juried recital (Music 249) in the last semester of private instruction. Students must prepare a minimum of 18 minutes of music to be performed in a formal public recital. Students will schedule a joint recital in groups of three or fewer.
4. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists
- Learn to transcribe and analyze jazz solos

9. Complete the following:

MUSIC 271 : Musicality in the Elementary School. (3:2:1)

PREREQUISITE: Acceptance into the Music Education: Elementary Education Emphasis program.

DESCRIPTION: Survey of authentic folk song and art music tonal systems and structures; their use in developing musical intuition through singing, movement, listening, and playing instruments.

**Course Outcomes**

- Students will analyze folk songs according to tone sets, scale types, rhythm patterns, and formal structures and create an organized index/retrieval system based on such analysis.
- Students will demonstrate ability to sing children' s songs with accurate pitch and intonation.
- Students will Improvise on piano and drums, patterns to guide young children' s movement leading toawareness of rhythms, meters, and formal structures.
- Students will demonstrate ability to accompany on autoharp or guitar, children' s folk and traditional songs, showing anunderstanding of keys and chord patterns.
- Students will take from dictation, folk song melodies and rhythms, and sing with accuracy intervals, pentatonic scales, and modes.
- Students will be able to explain how children learn, and how they learn music, including an understanding of development ateach age, windows of opportunity for learning certain things, and ages and stages of growth.
- Students will demontrate different strategies to effectively teach children using the teaching/learning processes explored in class.
- Students will demonstrate growth in knowledge of the use of technology in music education. In this class you will be asked toa. use finale to input music for flash cardsb. use the web to investigate music program offerings for young childrenc. use the web to locate businesses that specialize in early childhood music books, instruments,and other equipment for music development and explorationd. create a song index retrieval system you can use throughout your education career,e. review interactive music teaching computer programs available for children

MUSIC 272 : Developing Children's Musicality, Grades K--2. (3:1:2)

WHEN TAUGHT: Winter

PREREQUISITE: MUSIC 271

DESCRIPTION: Literature-based curriculum design and planning, grades K--2. Issues of pure intonation and vocal/aural development. Microteaching in a demonstration school.

**Course Outcomes**

- Students will analyze folk songs according to tone sets, scale types, rhythm patterns, and formal structures and create an organized index/retrieval system based on such analysis.
- Students will demonstrate ability to sing children' s songs with accurate pitch and intonation.
- Students will Improvise on piano and drums, patterns to guide young children' s movement leading toawareness of rhythms, meters, and formal structures.

11. Students who receive a grade lower than C– in any of the professional or support courses, or whose GPA drops below 2.85 in any of the professional or support courses, will be discontinued from the elementary education program.

12. Complete all GE courses, including the following, prior to beginning program:

EL ED 340 : Children's Literature. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary education or early childhood education major status.

DESCRIPTION: Trends and titles in children's and adolescent literature. Reading and critiquing as well as practical uses of children's literature in both school and home.

**Course Outcomes**

- 1. Students will understand and apply criteria in evaluating children's books for quality and function.
- 2. Students will gain a knowledge base concerning the field of children's literature as contained in the assigned textbook and class lectures.

SFL 210 : Human Development. (3:3:0)

OFFERED: Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Growth and development of the child from conception through adolescence; influences of family, peers, and schools.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Comprehend the dynamic and complex interaction among the domains of human development (e.g., biological, cognitive, emotional, social, etc.)Critically apply information learned in class to your own life.Provide knowledge and skills that will benefit the lives of the children for whom you will have stewardship in this life.Acquire a broad base of knowledge of human development.Be conversant with the major human development theories as well as their strengths and weaknesses.
- Improve your writing and critical thinking skills.
- Understand the research methodology utilized in the study of human development.

13. Complete an application seminar (seminar schedule posted on Education Advisement and Certification Center Web page and in 120 MCKB).

14. Complete the following courses after admission to the program:

CPSE 300 : Exceptional Students: Principles of Collaboration. (2:1:ARR)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: FBI fingerprint background clearance.

DESCRIPTION: Basic principles and legislative issues in effectively communicating and collaborating with professionals, parents, and other service providers to meet needs of individuals with disabilities in inclusive educational environments. Lab.

**Course Outcomes**

- Analyze student's learning difficulties and plan appropriate accommodations.
- Describe learning characteristics of special needs students.
- Develop assessment plans to evaluate students' progress and collaborate with school experts to support student learning.
- Collaboration: Candidates work effectively with parents, professionals, paraprofessionals, and others in the school and community to help students with disabilities achieve their IEP goals.
- Interpersonal Relations: Candidates work with students, parents, professionals, paraprofessionals, and others in the school and community with kindness and respect regardless of their diverse backgrounds.

- Identify culturally and linguistically relevant pedagogy and use theoretically grounded principles to analyze why it is effective for many different types of learners.
- Interpret the historical context of diversity, discrimination, and language policies and evaluate how they impact current school practices.

EL ED 323 : Foundations of Literacy Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Admittance into elementary education program.

DESCRIPTION: Language and literacy development for first and second language learners including theoretical underpinnings, processes, historical foundations, and instructional contexts that support language and literacy development for all K-6 children.

**Course Outcomes**

- Explain, compare and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)
- Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk). (IRA Standard 1.1.2)
- Explain, apply, and compare/contrast knowedge about second language literacy development in context. (IRA Standard 1.1.3 & NCTE Standard 9)
- Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)
- Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

EL ED 324 : Foundations of Classroom Management. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Exploring philosophies of classroom management focusing on promoting child guidance in an engaging and effective K-6 classroom learning environment.

**Course Outcomes**

- Upon completion of this course, students will be able to compare and contrast various theories and approaches to classroom management, describe ways to prevent management problems, describe practical approaches for addressing problems that arise, and identify approaches that align with the vision of the McKay School of Education.
- Upon completion of this course, students will be able to describe and justify necessary components of an effective learning environment, including, but not limited to, aspects related to physical space, academic approaches, and the social/emotional environment.
- Upon completion of this course, students will formulate a personal philosophy statement describing their approach to management and the learning environment which includes expectations and responsibilities of both the teacher and of the students.

EL ED 333 : Teaching Literacy in the Primary Grades (K-2). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 323; Concurrent enrollment in El Ed 332.

DESCRIPTION: Instructional practices for teaching children the literacy concepts, skills, and strategies they need to learn in grades K-2. Assessing, monitoring, and evaluating children's literacy knowledge and learning in grades K-2.

**Course Outcomes**

There are no course outcomes available

EL ED 335 : Early Childhood Education Integration Methods. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent enrollment in El Ed 332.

DESCRIPTION: Methods in designing an early childhood curriculum with attention to hands-on experiences meeting children's individual learning needs and addressing contextual factors in the child's life experiences.

**Course Outcomes**

- a) understanding young childrenâ s characteristics and needs, including issues of diversity, and complex characteristics of families b) understanding effective and appropriate methods for supporting young childrenâ s growth and development in a classroom setting c) knowledge of K-3 instructional and assessment strategies in content areas (literacy, math, science, social studies, arts), d) understanding purposes and application of curriculum integration

EL ED 440 : Grades 3-6 Practicum Seminar. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; concurrent with El Ed 442; FBI fingerprint and background clearance.

DESCRIPTION: Prepare for and reflect on the 3-6 practicum experience.

**Course Outcomes**

There are no course outcomes available

EL ED 442 : Practicum in the Elementary Education 3-6 Classroom. (2:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 332; Concurrent enrollment in El Ed 440.

DESCRIPTION: Applying knowledge from foundational and content courses to teaching in a 3-6 classroom. Observing, planning, teaching, assessing, and reflecting in a 3-6 public school setting.

**Course Outcomes**

There are no course outcomes available

EL ED 443 : Teaching Literacy in the Intermediate Grades (3-6). (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: EL ED 333; Concurrent enrollment in El Ed 442.

DESCRIPTION: Information and skills needed to make informed decisions about literacy instruction and evaluation. Establishing an effective 3-6 grade classroom literacy environment.

**Course Outcomes**

There are no course outcomes available

EL ED 445 : Teaching Social Studies in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The methods, skills, and strategies for teaching social studies in grades K-6. Modeling democratic teaching practices and establishing democratic classrooms to prepare children to assume roles as participatory citizens in a democracy.

**Course Outcomes**

There are no course outcomes available

EL ED 446 : Teaching Science in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: Developing the pedagogical knowledge, skills, and dispositions necessary to teach science to elementary children of various ages, abilities, backgrounds, and exceptionalities.

**Course Outcomes**

There are no course outcomes available

EL ED 447 : Teaching Mathematics in Grades K-6. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MTHED 305 & MTHED 306 & IP&T 213; Concurrent enrollment in El Ed 442.

DESCRIPTION: The teaching and learning of elementary school mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

**Course Outcomes**

- Preservice teachers enrolled in El Ed 447 will:Make appropriate decisions relative to teaching mathematics in K-6 classroomsPlan and implement standards-based lessons to teach mathematics conceptsPlan and use mathematics inquiry groups and student discourse for assessing studentsExamine provisions for students with varying language and cultural backgroundsPractice professionalism: in commitment to learning to teach, in appearance and demeanor, and in the quality of work submitted

IP&T 213 : Foundations of Instructional Design and Assessment. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Elementary Education major status.

DESCRIPTION: Curriculum design and assessment theory, strategies, and tools for the K-6 classroom. Backward design and seamless assessment for informing and improving student performance.

**Course Outcomes**

- Teacher candidates will be able to describe, define and apply the principles and science of assessment to determine instructional needs, design and deliver effective instruction and communicate assessment results to appropriate audiences in a multi-tiered system of support.
- Teacher candidates will be able to describe their role and responsibility regarding curriculum standards and ensure that curriculum addresses the needs of diverse students.
- Teacher candidates will be able to synthesize and employ assessment evidence to inform instructional decision-making, interpret data to evaluate instruction, and apply a problem-solving process to address students' cognitive, social-emotional and linguistic learning needs within a multi-tiered system of support.
- Teacher candidates will be able to define, design and employ evidenced-based instructional practices within a multi-tiered system of support.

IP&T 444 : Integrating Technology in Elementary Education. (1:1:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Concurrent with El Ed 445 and El Ed 446.

DESCRIPTION: Integrating instructional technology into K-6 instructional strategies.

**Course Outcomes**

- Students will increase their familiarity with and ability to use a wide range of educational technologies.
- Students will develop positive dispositions towards using educational technologies that can help improve student learning.
- Student will strengthen their knowledge of ways to use technology in teaching core content areas (fine arts, language arts, math, science, & social studies) that lead to improved effectiveness, engagement, and/or efficiency.
- Students will practice their technology integration skills in real-world upper elementary level settings and learn to evaluate the strengths and weaknesses of their performance.
- Students will understand basic issues related to internet safety for children and create lessons that help children have positive, safe experiences with online technologies. Students will follow fairuse guidelines as they incorporate digital media into their teaching.

MTHED 305 : Basic Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Math 110 or equivalent; permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of number, measurement, and informal geometry in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

**Course Outcomes**

- Students have a deep understanding of central concepts in elementary school mathematics related to whole numbers and whole number operations, number theory, integers and integer operations, geometry, and measurement; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 305 classroom to make inferences about teaching practices that help children learn mathematics.

MTHED 306 : Concepts of Mathematics. (3:3:1)

WHEN TAUGHT: Fall; Winter; Summer

PREREQUISITE: MTHED 305; Permission from Teacher Education Department.

DESCRIPTION: Concept-oriented exploration of rational numbers and proportional reasoning, probability, and early algebraic reasoning in relation to children's learning.

NOTE: Required of prospective elementary school teachers.

**Course Outcomes**

- Students have a deep understanding of central concepts in elementary school mathematics related to fractions and fraction operations, probability, and early algebraic reasoning; as well as core representations, canonical examples, patterns in children's thinking, and alternative algorithms germane to teaching these concepts.
- Students engage productively in mathematical inquiry, effectively communicate their mathematical ideas and reasoning with their peers, and reflect on the teaching practices modeled in the MthEd 306 classroom to make inferences about teaching practices that help children learn mathematics.
- Students understand mathematics as a sense-making activity, can solve problems by employing conceptual understanding and mathematical reasoning, and can reflect on their own learning to make inferences about how children experience and understand mathematics.

15. Complete 12 hours of one of the following (prior application required):

EL ED 400R : Elementary Student-Teaching. (1-12:ARR:ARR)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Semester-long or two consecutive term, full-day student teaching experience in the public schools. Seminar attendance required.

NOTE: See Education Student Services for application dates.

**Course Outcomes**

- The student teacher will observe, plan, teach, assess, and reflect throughout the course as they participate in a public school setting.
- The student teacher will apply knowledge from various content courses as they relate to teaching in an elementary classroom.
- The student teacher will apply knowledge of various pedagogical approaches and methods and when they are most appropriate for which subject or lesson type.

EL ED 496R : Academic Internship. (8-12:ARR:ARR)

WHEN TAUGHT: Fall

PREREQUISITE: Three-semester professional sequence and prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (El Ed 302, 356, 357, 361, 363, 365, 372).

DESCRIPTION: A full-year classroom teaching internship in the public schools in lieu of El Ed 400, student teaching.

NOTE: See Education Student Services for application dates.

## Recommended Courses

The following courses are strongly recommended:

BIO 100 : Principles of Biology. (3:3:0)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Introductory course for general education students.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

There are no course outcomes available

BIO 175 : Principles of Biology Laboratory. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Elementary education or early childhood education pre-major or major status; concurrent enrollment in Bio 100.

**Course Outcomes**

There are no course outcomes available

EL ED 202 : Foundations of Child Development. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Major status.

DESCRIPTION: The development of the whole child including cognitive, social, emotional, linguistic, and physical development and how to apply it to planning, teaching, and assessing children.

**Course Outcomes**

- The candidate will demonstrate knowledge of social, cognitive and physical development of children ages birth to 12.
- The candidate will understand how the knowledge of child development will impact instructional practices in the school classroom.

ENGL 313 : Expository Writing for Elementary Education Majors. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: First-year writing, junior or senior status.

DESCRIPTION: Learning to write as professional educators and to teach writing to children. Best taken before the professional sequence. Library research paper.

NOTE: Carries GE Advanced Written and Oral Communication credit.

**Course Outcomes**

There are no course outcomes available

GEOG 120 : Geography and World Affairs. (3:3:0)

OFFERED: Honors also. Independent Study also.

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Survey of the world, stressing geography of major political regions.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

There are no course outcomes available

PETE 212 : Physical Education for Elementary School Teachers. (2:1:3)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: PETE 169; FBI fingerprint and background clearance.

**Course Outcomes**

- The students will Interact with students with special needs.
- The students will explore interactions of students in the classroom.

VAEDU 326 : Art for Elementary Teachers. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Preservice preparation designed to help elementary classroom teachers understand the visual arts and develop skills necessary for implementing a discipline-based approach for art education.

**Course Outcomes**

No outcomes are available at this time.

*Hours include courses that may fulfill university core requirements.

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

The bachelor of music degree in performance prepares the student for professional work as a performer, a studio teacher, or a combination of both. Some will pursue advanced work on the graduate level to prepare for a performance career or college teaching.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center for the application procedure for official acceptance into a specific degree program.
2. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

MUSIC 197 : Sight Singing 1. (.5:0:1)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major.

DESCRIPTION: Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

**Course Outcomes**

- Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

MUSIC 198 : Sight Singing 2. (.5:0:1)

WHEN TAUGHT: Winter; Summer

PREREQUISITE: C- or higher in Music 197.

DESCRIPTION: Continuation of Music 197.

**Course Outcomes**

- students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

MUSIC 221 : Functional Piano Skills 1. (2:2:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: Piano skills determined by entrance diagnostic exam; music major status.

DESCRIPTION: Provides music majors with basic keyboarding ability in such areas as sight reading, technique, harmonization, and score reading.

**Course Outcomes**

- At the end of this class, students should be able to:Play major and minor cadences using tonic, sub-dominant and dominant chords in all keys at a tempo of 80, one chord per beat.
- Harmonize melodies using the assigned accompaniment patterns demonstrating an ability to use chords in root and inverted positions.
- Play common melodies by ear using assigned chordal accompaniments.
- Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.
- Play the major and harmonic minor scales that begin on the white keys for one octave up and down the keyboard at a tempo of 100 – two notes per beat.
- Be able to sight read given examples with a minimum of mistakes and hesitations.

MUSIC 395 : Form and Analysis. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: C- or higher in Music 293, 295.
DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

8. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: C- or higher in Music 293, 295.

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

8. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Exploration of music making from a global perspective.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-

scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists
- Learn to transcribe and analyze jazz solos

9. Complete the following:

MUSIC 166 : Organ Registration. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent private or group instruction in organ or instructor's consent

DESCRIPTION: Organ stops and their application to various performance styles.

**Course Outcomes**

- During this class students learn basic concepts of organ registration and organ design as they pertain to hymn playing and general church service playing. Additionally, they learn the registration practices associated with historic periods and musical styles corresponding to the differing instrument types, musical genres and composers from the Middle Ages through the present.

MUSIC 264 : Keyboard Foundations 1. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 194 & MUSIC 198 & MUSIC 260R

DESCRIPTION: Sight-reading, harmonization, improvisation, and technique at the keyboard.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

MUSIC 265 : Keyboard Foundations 2. (2:2:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MUSIC 264

DESCRIPTION: Continuation of Music 264.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world including: Sightreading, Modulation, Open Score Reading, Figured Bass, Transposition and Fakebook Improvisation.

MUSIC 364 : Keyboard Pedagogy. (2:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 249; Junior standing and successful completion of Music 249.

DESCRIPTION: Basic pedagogical principles as applied to keyboard instruments.

**Course Outcomes**

- The objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.

- Through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

MUSIC 365 : Piano Pedagogy. (2:2:1)
WHEN TAUGHT: Winter
PREREQUISITE: MUSIC 364
DESCRIPTION: Preparation for supervised private or group teaching.

**Course Outcomes**

- As a continuation of Music 364, the objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.
- As a continuation of Music 364, through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

MUSIC 366 : Organ Pedagogy. (2:2:1)
WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: MUSIC 364
DESCRIPTION: Preparation for supervised private or group teaching.

**Course Outcomes**

- Learn teaching techniques from prominent music teachers (including organ teachers) both in and out of the local area.

MUSIC 466R : Organ Practicum. (2:2:1)
WHEN TAUGHT: Fall Odd Yrs.; Winter Odd Yrs.
PREREQUISITE: Music 166 or organ performance major status. Must be taken in consecutive winter and fall semesters.
DESCRIPTION: Developing various practical skills required of the organist.

**Course Outcomes**

- To play hymns using a wide variety of techniques and with artistry, encouraging congregational participation and enthusiasm, and to conduct hymns adequately.
- To accompany choirs at the organ, interpreting and preparing the score properly, managing the console with mastery, and following the director accurately and musically.

10. Complete two hours of the following:

MUSIC 470R : Keyboard Teaching Practicum. (1:0:3)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Completion of required pedagogy class or instructor's consent.
DESCRIPTION: Applying pedagogical principles to teaching.

**Course Outcomes**

No outcomes are available at this time.

: Keyboard Teaching Practicum: Piano.

**Course Outcomes**

: Keyboard Teaching Practicum: Organ.

**Course Outcomes**

11. Complete the following:

MUSIC 469 : Theory and Methods of Studio Teaching. (1:1:0)
WHEN TAUGHT: Winter
PREREQUISITE: Completion of required pedagogy class or instructor's consent.
DESCRIPTION: Applying learning theory and secondary education methods to studio teaching.

**Course Outcomes**

- Students will gain a theoretical base in beginning and maintaining a successful studio.

12. Complete three courses from the following:

MUSIC 403A : Piano Literature. (2:2:0)
WHEN TAUGHT: Fall
PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
DESCRIPTION: Survey of literature. Research in area of concentration.

**Course Outcomes**

- This course is designed for the advanced keyboard performer, and consists of projects in keyboard

harmony, sight-reading, transposition, modulation, improvisation, playing by ear, and score reading, in pursuit of developing the complete keyboard fluency.

MUSIC 403B : Piano Literature. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.

DESCRIPTION: Continuation of Music 403A.

**Course Outcomes**

- This course will explore piano literature from late Classical, Romantic, Impressionistic, and Contemporary periods of music history including composer surveys, analysis, aural and score recognition, performances and performance practices. The goal of this course is for each student to gain a broad understanding of the subject and develop a love for the rich heritage of the medium. A major purpose of the course is to instill in students a curiosity essential for lifetime discovery. Thorough knowledge and appreciation of the piano repertoire is crucial for a successful career in performance and teaching.

MUSIC 404A : Organ Literature. (2:2:0)

WHEN TAUGHT: Fall Odd Yrs.

PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.

DESCRIPTION: Survey of literature. Research in area of concentration.

**Course Outcomes**

- The course objective is to further an acquaintance and familiarity with the repertory, composers, forms and genres, stylistic features, analytical techniques and general performance practices associated with organ literature from the earliest sources of the fourteenth century through the music of Johann Sebastian Bach.

MUSIC 404B : Organ Literature. (2:2:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.

DESCRIPTION: Continuation of Music 404A.

**Course Outcomes**

- A continuation of 404A, with the focus being on organ literature from the mid-eighteenth century to the present.

13. Present a juried recital (Music 249) during the sophomore year. A juried senior recital (Music 449) is also required.

**Recital:** Enroll in 249 (0.0 credit hours) or 449 (1.0 credit hour) for the semester during which a recital is to be presented. Concurrent enrollment in appropriate performance instruction is required. A prerecital hearing is required at least three weeks before juried recitals. Contact the Harris Fine Arts Center Scheduling Office (D-359, south lobby of Pardoe Theatre) for further information.

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

The bachelor of music degree in performance prepares the student for professional work as a performer, a studio teacher, or a combination of both. Some will pursue advanced work on the graduate level to prepare for a performance career or college teaching.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center for the application procedure for official acceptance into a specific degree program.
2. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

MUSIC 197 : Sight Singing 1. (.5:0:1)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major.

DESCRIPTION: Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

**Course Outcomes**

- Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

MUSIC 198 : Sight Singing 2. (.5:0:1)

WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 197.
DESCRIPTION: Continuation of Music 197.

**Course Outcomes**

- students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

MUSIC 293 : Dictation 3. (1:0:2)

WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 194; concurrent enrollment in Music 295.
DESCRIPTION: Continuation of Music 194.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify compound intervals. You will also be expected to write out rhythms and melodies up to eight bars in length. Finally, you will be asked to write the four parts of harmonic progressions and identify them by roman and arabic numerals (these harmonies will include chromatic harmonies—secondary dominants, borrowed chords, and augmented sixth chords).

MUSIC 294 : Dictation 4. (1:0:2)

WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 293; concurrent enrollment in Music 296.
DESCRIPTION: Continuation of Music 293.

**Course Outcomes**

- In this concluding course in dictation we practice music dictation of four things: 1. linear tetrachords 2. twelve-tone rows 3. syncopated rhythms (always played in four measures of 3/4) 4. modulating chord progressions

MUSIC 295 : Music Theory 3. (3:3:0)

WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 196; concurrent enrollment in Music 293.
DESCRIPTION: Extended chromatic techniques and introduction to twentieth-century concepts.

**Course Outcomes**

- Students will be able to part-write and analyze (using means covered in Music Theory 1 and 2) in a full range of chromatic harmony (including Neapolitan and augmented sixth chords, as well as enharmonic and common-tone modulations). Students will also be able to identify and analyze impressionist techniques (including types of planing, tall chords, and alternative scales).

MUSIC 296 : Music Theory 4. (3:3:0)

WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 295; concurrent enrollment in Music 294.
DESCRIPTION: Set theory, serialism, and late twentieth-century concepts.

**Course Outcomes**

- Students will learn how to use pitch-class set analysis (identifying, labeling, and comparing any groups of pitches) and various serial techniques (including the twelve-tone method), as well as to analyze post-impressionistic techniques (bichordalism, polytonality, quartal and quintal harmony, secundal harmony, and pandiatonicism) and identify (and possibly write with) a variety of rhythmic, indeterminate, minimalist, microtonal and possibly other contemporary techniques.

MUSIC 297 : Sight Singing 3. (.5:0:1)

WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 198.
DESCRIPTION: Continuation of Music 198.

**Course Outcomes**

- Students continue to develop skills in sight singing, as built on the foundations of Sight Singing 1 and 2.

MUSIC 298 : Sight Singing 4. (.5:0:1)

WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 297.
DESCRIPTION: Continuation of Music 297.

**Course Outcomes**

- Students build on the fundamentals of sight singing 1,2 and 3.

3. Complete one course from the following:

MUSIC 235A : Instrumental Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct an instrumental performance ensemble.

**Course Outcomes**

- Students will develop the physical techniques and interpretive skills required to be an instrumental conductor.
- Students will be able to:--Explain and demonstrate the conductor's correct posture, stance, baton grip, and hand/arm position.--Explain and demonstrate the conductor's preparatory gesture, ictus, rebound, the conducting patterns.--Demonstrate expressive and ambidextrous use of both hands as it relates to the musical score.--Conduct in various articulation styles, legato, staccato, marcato, & tenuto--Conduct clear beat patterns, mixed meter, subdivision, and cuing technique.--Define musical terms as useful for a conductor., and understand/explain the transpositions of instruments found within a musical score.--Convincingly conduct a variety of musical excerpts

MUSIC 235B : Choral Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct a choral performance ensemble.

**Course Outcomes**

- Students will demonstrate in their own conducting an understanding of and proficiency with the following techniques: beat patterns, style (legato/marcato), the conducting field, breath releases, melding, the SuperClick, subdivision of beats, fermatas, dynamics, cuing, phrase shaping, irregular meters, and multi metrics.

4. Complete eight hours of the following:

MUSIC 260R : Performance Instruction. (.5-2:1:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status.

DESCRIPTION: Private instruction and studio class.

NOTE: From one to four hours of daily practice. Fee.

**Course Outcomes**

- By preparing for and attending weekly lessons, students will develop their technique, and strengthen their interpretive skills.

7. Complete one hour of Category 1: Approved Large Ensembles (see General Information) each semester for four semesters. The Category 2 ensemble Music 344R may substitute for two of these four hours, but the two hours must be in consecutive fall and winter semesters.

8. Complete the following upper-division music core courses:

MUSIC 301 : Survey of Music Literature 1. (2:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.

DESCRIPTION: Survey of musical genres, forms, styles, and performance practices from antiquity to the Enlightenment.

**Course Outcomes**

There are no course outcomes available

MUSIC 302 : Survey of Music Literature 2. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 and 202, or equivalent.

DESCRIPTION: Survey of musical genres, forms, styles, and performance practices in the 18th and 19th centuries.

**Course Outcomes**

There are no course outcomes available

MUSIC 303 : Survey of Music Literature 3. (2:2:0)

WHEN TAUGHT: Fall; Winter; Summer Contact Department

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.

DESCRIPTION: Survey of music genres, forms, styles, and performance practices from the late Romantic era to the present.

**Course Outcomes**

There are no course outcomes available

MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: C- or higher in Music 293, 295.

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

9. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Exploration of music making from a global perspective.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an

understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.

- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists
- Learn to transcribe and analyze jazz solos

10. Complete the following:

MUSIC 166 : Organ Registration. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: Concurrent private or group instruction in organ or instructor's consent

DESCRIPTION: Organ stops and their application to various performance styles.

**Course Outcomes**

- During this class students learn basic concepts of organ registration and organ design as they pertain to hymn playing and general church service playing. Additionally, they learn the registration practices associated with historic periods and musical styles corresponding to the differing instrument types, musical genres and composers from the Middle Ages through the present.

MUSIC 264 : Keyboard Foundations 1. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 194 & MUSIC 198 & MUSIC 260R

DESCRIPTION: Sight-reading, harmonization, improvisation, and technique at the keyboard.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

MUSIC 265 : Keyboard Foundations 2. (2:2:0)

WHEN TAUGHT: Winter; Spring
PREREQUISITE: MUSIC 264
DESCRIPTION: Continuation of Music 264.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world including: Sightreading, Modulation, Open Score Reading, Figured Bass, Transposition and Fakebook Improvisation.

MUSIC 364 : Keyboard Pedagogy. (2:2:1)

WHEN TAUGHT: Fall
PREREQUISITE: MUSIC 249; Junior standing and successful completion of Music 249.
DESCRIPTION: Basic pedagogical principles as applied to keyboard instruments.

**Course Outcomes**

- The objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.
- Through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

MUSIC 366 : Organ Pedagogy. (2:2:1)

WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: MUSIC 364
DESCRIPTION: Preparation for supervised private or group teaching.

**Course Outcomes**

- Learn teaching techniques from prominent music teachers (including organ teachers) both in and out of the local area.

MUSIC 404A : Organ Literature. (2:2:0)

WHEN TAUGHT: Fall Odd Yrs.
PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
DESCRIPTION: Survey of literature. Research in area of concentration.

**Course Outcomes**

- The course objective is to further an acquaintance and familiarity with the repertory, composers, forms and genres, stylistic features, analytical techniques and general performance practices associated with organ literature from the earliest sources of the fourteenth century through the music of Johann Sebastian Bach.

MUSIC 404B : Organ Literature. (2:2:0)

WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.
DESCRIPTION: Continuation of Music 404A.

**Course Outcomes**

- A continuation of 404A, with the focus being on organ literature from the mid-eighteenth century to the present.

MUSIC 466R : Organ Practicum. (2:2:1)

WHEN TAUGHT: Fall Odd Yrs.; Winter Odd Yrs.
PREREQUISITE: Music 166 or organ performance major status. Must be taken in consecutive winter and fall semesters.
DESCRIPTION: Developing various practical skills required of the organist.

**Course Outcomes**

- To play hymns using a wide variety of techniques and with artistry, encouraging congregational participation and enthusiasm, and to conduct hymns adequately.
- To accompany choirs at the organ, interpreting and preparing the score properly, managing the console with mastery, and following the director accurately and musically.

(twice).

**Note:** Two semesters of Music 466R must be taken in consecutive winter and fall semesters.

11. Complete two hours of the following:

MUSIC 470R : Keyboard Teaching Practicum. (1:0:3)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: Completion of required pedagogy class or instructor's consent.
DESCRIPTION: Applying pedagogical principles to teaching.

**Course Outcomes**

No outcomes are available at this time.

: Keyboard Teaching Practicum: Piano.

**Course Outcomes**

: Keyboard Teaching Practicum: Organ.

**Course Outcomes**

12. Complete the following:

MUSIC 469 : Theory and Methods of Studio Teaching. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: Completion of required pedagogy class or instructor's consent.

DESCRIPTION: Applying learning theory and secondary education methods to studio teaching.

**Course Outcomes**

- Students will gain a theoretical base in beginning and maintaining a successful studio.

13. Complete one course from the following:

MUSIC 483 : Counterpoint. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: C- or higher in Music 294, 296.

DESCRIPTION: Eighteenth-century contrapuntal styles and techniques, emphasizing those of J. S. Bach.

**Course Outcomes**

There are no course outcomes available

MUSIC 583 : Sixteenth-Century Counterpoint. (3:3:0)

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

The bachelor of music degree in performance prepares the student for professional work as a performer, a studio teacher, or a combination of both. Some will pursue advanced work on the graduate level to prepare for a performance career or college teaching.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center for the application procedure for official acceptance into a specific degree program.
2. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

MUSIC 197 : Sight Singing 1. (.5:0:1)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major.

DESCRIPTION: Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

**Course Outcomes**

- Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

MUSIC 198 : Sight Singing 2. (.5:0:1)

WHEN TAUGHT: Winter; Summer

PREREQUISITE: C- or higher in Music 197.

DESCRIPTION: Continuation of Music 197.

**Course Outcomes**

- students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

MUSIC 221 : Functional Piano Skills 1. (2:2:0)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: Piano skills determined by entrance diagnostic exam; music major status.

DESCRIPTION: Provides music majors with basic keyboarding ability in such areas as sight reading, technique, harmonization, and score reading.

**Course Outcomes**

- At the end of this class, students should be able to:Play major and minor cadences using tonic, sub-dominant and dominant chords in all keys at a tempo of 80, one chord per beat.
- Harmonize melodies using the assigned accompaniment patterns demonstrating an ability to use chords in root and inverted positions.
- Play common melodies by ear using assigned chordal accompaniments.
- Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.
- Play the major and harmonic minor scales that begin on the white keys for one octave up and down the keyboard at a tempo of 100 – two notes per beat.
- Be able to sight read given examples with a minimum of mistakes and hesitations.
- Perform assigned repertoire demonstrating an ability to play expressively while observing all terms and symbols, and fingering, at a tempo appropriate for the piece.
- Perform assigned accompaniments to solos demonstrating an ability to follow the performance of the soloist.

MUSIC 222 : Functional Piano Skills 2. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: C- or higher in Music 221; music major status.

DESCRIPTION: Continuation of Music 221.

**Course Outcomes**

- Continuing to build upon skills gained from Mus 221, students will also be able to:Play the assigned progressions in all keys up to four sharps and four flats at a tempo of 88 per half note.
- Harmonize given melodies using the assigned accompaniment pattern and chord symbols demonstrating ease in moving from chord to the next.
- By ear, play a common melodies with the right hand as assigned. With the left hand, play a chordal accompaniment using the assigned accompaniment pattern.
- Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.
- Improvise a melody with the right hand while playing the assigned chordal accompaniment with the left hand.
- Play major and harmonic minor scales that begin on the white keys for two octaves up and down the keyboard at a tempo of 120 – two notes per beat.

DESCRIPTION: Set theory, serialism, and late twentieth-century concepts.

**Course Outcomes**

- Students will learn how to use pitch-class set analysis (identifying, labeling, and comparing any groups of pitches) and various serial techniques (including the twelve-tone method), as well as to analyze post-impressionistic techniques (bichordalism, polytonality, quartal and quintal harmony, secundal harmony, and pandiatonicism) and identify (and possibly write with) a variety of rhythmic, indeterminate, minimalist, microtonal and possibly other contemporary techniques.

MUSIC 297 : Sight Singing 3. (.5:0:1)

WHEN TAUGHT: Fall; Spring

PREREQUISITE: C- or higher in Music 198.

DESCRIPTION: Continuation of Music 198.

**Course Outcomes**

- Students continue to develop skills in sight singing, as built on the foundations of Sight Singing 1 and 2.

MUSIC 298 : Sight Singing 4. (.5:0:1)

WHEN TAUGHT: Winter; Summer

PREREQUISITE: C- or higher in Music 297.

DESCRIPTION: Continuation of Music 297.

**Course Outcomes**

- Students build on the fundamentals of sight singing 1,2 and 3.

3. Complete one course from the following:

MUSIC 235A : Instrumental Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct an instrumental performance ensemble.

**Course Outcomes**

- Students will develop the physical techniques and interpretive skills required to be an instrumental conductor.
- Students will be able to:--Explain and demonstrate the conductor's correct posture, stance, baton grip, and hand/arm position.--Explain and demonstrate the conductor's preparatory gesture, ictus, rebound, the conducting patterns.--Demonstrate expressive and ambidextrous use of both hands as it relates to the musical score.--Conduct in various articulation styles, legato, staccato, marcato, & tenuto--Conduct clear beat patterns, mixed meter, subdivision, and cuing technique.--Define musical terms as useful for a conductor., and understand/explain the transpositions of instruments found within a musical score.--Convincingly conduct a variety of musical excerpts

MUSIC 235B : Choral Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct a choral performance ensemble.

**Course Outcomes**

- Students will demonstrate in their own conducting an understanding of and proficiency with the following techniques: beat patterns, style (legato/marcato), the conducting field, breath releases, melding, the SuperClick, subdivision of beats, fermatas, dynamics, cuing, phrase shaping, irregular meters, and multi metrics.

4. Complete eight hours of the following:

MUSIC 260R : Performance Instruction. (.5-2:1:1)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Music major status.
DESCRIPTION: Private instruction and studio class.
NOTE: From one to four hours of daily practice. Fee.

**Course Outcomes**

- By preparing for and attending weekly lessons, students will develop their technique, and strengthen their interpretive skills.

MUSIC 395 : Form and Analysis. (3:3:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: C- or higher in Music 293, 295.
DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

8. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists

- Learn to transcribe and analyze jazz solos

9. Complete the following:

MUSIC 273A : Percussion Techniques. (.5:1:0)

WHEN TAUGHT: Fall

PREREQUISITE: Percussion performance major or music education major with percussion emphasis.

DESCRIPTION: Accessory and concert percussion instruments and related performance literature.

**Course Outcomes**

- Introduce basic concepts utilized in concert percussion performance. The focus will be on instruments that would be the part of a percussion section in a concert band, orchestra, or percussion ensemble.Students will become familiar with basic techniques on snare drum, bass drum, cymbals, timpani, keyboard percussion and percussion accessory instruments. Application of these techniques will be related to literature as well as an understanding of basic maintenance, tuning and care of the instruments. Students will be able to demonstrate their ability to play these instruments in a variety of ensemble performance situations with confidence.

MUSIC 273B : Percussion Techniques. (.5:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: Music 273A or instructor's consent.

DESCRIPTION: Introduction to world percussion, drum set, and marching percussion techniques.

**Course Outcomes**

- Students will become familiar with basic techniques on instruments from Africa, Brazil, Cuba, the Middle East, Asia, and other parts of the world. Some exposure to these exotic instruments will take place with an emphasis of “hands on” experiences. Application of these techniques will be related to literature and recordings as well as an understanding of basic maintenance, tuning and care of the instruments. Students will be able to demonstrate their ability to play these instruments in a variety of performance situations with confidence.

MUSIC 405 : Chamber Music Literature. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: C- or higher in Music 306; concurrent enrollment in 460R, or instructor's consent.

DESCRIPTION: Survey of literature, including research in field of concentration.

**Course Outcomes**

- To understand the important trends in chamber music through its history.To have opportunities to listen to and become familiar with a small portion of this great literatureTo research, read, and write about the chamber music literature on a topic of your choiceTo attend, and write intelligently about, live performances.To acquire a foundation for your continued enjoyment of chamber music as a listener and performer

10. Complete five hours from the following:

MUSIC 323R : Marching Band. (1:0:6)

WHEN TAUGHT: Fall

PREREQUISITE: Audition or director's consent.

**Course Outcomes**

- As learning outcomes, students should be able to apply the musical principles of individual, section, and ensemble musical tone production, correct notes, rhythms and dynamics, balance and blend, and correct marching execution. Students should be able to demonstrate application of these principles by successfully performing college-level marching band repertoire in rehearsal and performances.

MUSIC 330R : Steel Band. (1:0:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Director's consent.

**Course Outcomes**

- Students should be exposed to music outside the Western European tradition. Most of the music performed in this ensemble includes Calypso and Soca styles from the island nation of Trinidad and Tobago. We will sometimes include a pop or classical number, but most of the time we will focus on “groove” music. This means that having a conductor will be rare and the student is expected to listen and learn how to contribute to that “groove”.

MUSIC 331R : Jazz Combos. (1:1:2)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Audition.

**Course Outcomes**

- Students will learn how to function in a traditional jazz combo setting, including learning head charts, standard lead sheet tunes, and arrangements. They will also further their knowledge of and experience in improvising in a typical professional performance setting in a variety of jazz styles.

MUSIC 336R : Balinese Gamelan. (1:2:0)

WHEN TAUGHT: Fall; Winter
DESCRIPTION: Playing and performing on the Balinese gamelan (percussion) instruments.

**Course Outcomes**

- Students participating in Gamelan will learn the mental and technical skills required to memorize and perform works from the traditional Balinese gamelan repertoire, including becoming proficient on one or more of the instruments in the ensemble.
- Students will also use music as a window into the relationship between Balinese musical practice and Balinese social and religious culture, and, more broadly, develop a deep appreciation for this musicâ s profound contribution to the life experience.
- In the spirit of BYUâ s global mission and the breadth of educational experience advocated in BYUâ s guiding documents, successful students in gamelan will develop a greater understanding of and respect for music and traditions outside of their native experience. This respect will better prepare them to represent BYU and the Church in an increasingly interconnected global society.

MUSIC 345R : Percussion Ensemble. (1:0:2)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Director's consent.

**Course Outcomes**

- To expose students to the music written for percussion ensemble, to help students develop technique(s) on a myriad of instruments while contributing musically, and to present musical situations with and without a conductor. The percussion parts in a percussion ensemble differ drastically from those found in traditional orchestral and band percussion scores in that most performers must be not only rhythmically proficient, but melodically, harmonically and texturally expressive.

11. Complete five hours of music electives. See faculty advisor.
12. Present a juried recital (Music 349) during the junior year. A juried senior recital (Music 449) is also required.

**Recital:** Enroll in 349 (0.0 credit hours) or 449 (1.0 credit hour) for the semester during which a recital is to be presented. Concurrent enrollment in appropriate performance instruction is required. A prerecital hearing is required at least three weeks before juried recitals. Contact the Harris Fine Arts Center Scheduling Office (D-359, south lobby of Pardoe Theatre) for further information.

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this emphasis.*

The keyboard performance degree prepares students for professional work as performers and studio teachers. The degree includes a strong pedagogy emphasis, including supervised teaching. Many performance majors continue their studies on the graduate level to further prepare for a performance career or college teaching.

## Program Requirements | View MAP | View Program Outcomes

1. See the college advisement center for the application procedure for official acceptance into a specific degree program.
2. Complete the following lower-division music core courses:

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

MUSIC 197 : Sight Singing 1. (.5:0:1)
WHEN TAUGHT: Fall; Spring

PREREQUISITE: Acceptance as a music major.
DESCRIPTION: Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

**Course Outcomes**

- Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

MUSIC 198 : Sight Singing 2. (.5:0:1)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 197.
DESCRIPTION: Continuation of Music 197.

**Course Outcomes**

- students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

MUSIC 293 : Dictation 3. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 194; concurrent enrollment in Music 295.
DESCRIPTION: Continuation of Music 194.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify compound intervals. You will also be expected to write out rhythms and melodies up to eight bars in length. Finally, you will be asked to write the four parts of harmonic progressions and identify them by roman and arabic numerals (these harmonies will include chromatic harmonies—secondary dominants, borrowed chords, and augmented sixth chords).

MUSIC 294 : Dictation 4. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 293; concurrent enrollment in Music 296.
DESCRIPTION: Continuation of Music 293.

**Course Outcomes**

- In this concluding course in dictation we practice music dictation of four things: 1. linear tetrachords 2. twelve-tone rows 3. syncopated rhythms (always played in four measures of 3/4) 4. modulating chord progressions

MUSIC 295 : Music Theory 3. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 196; concurrent enrollment in Music 293.
DESCRIPTION: Extended chromatic techniques and introduction to twentieth-century concepts.

**Course Outcomes**

- Students will be able to part-write and analyze (using means covered in Music Theory 1 and 2) in a full range of chromatic harmony (including Neapolitan and augmented sixth chords, as well as enharmonic and common-tone modulations). Students will also be able to identify and analyze impressionist techniques (including types of planing, tall chords, and alternative scales).

MUSIC 296 : Music Theory 4. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 295; concurrent enrollment in Music 294.
DESCRIPTION: Set theory, serialism, and late twentieth-century concepts.

**Course Outcomes**

- Students will learn how to use pitch-class set analysis (identifying, labeling, and comparing any groups of pitches) and various serial techniques (including the twelve-tone method), as well as to analyze post-impressionistic techniques (bichordalism, polytonality, quartal and quintal harmony, secundal harmony, and pandiatonicism) and identify (and possibly write with) a variety of rhythmic, indeterminate, minimalist, microtonal and possibly other contemporary techniques.

MUSIC 297 : Sight Singing 3. (.5:0:1)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: C- or higher in Music 198.
DESCRIPTION: Continuation of Music 198.

**Course Outcomes**

- Students continue to develop skills in sight singing, as built on the foundations of Sight Singing 1 and 2.

MUSIC 298 : Sight Singing 4. (.5:0:1)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 297.
DESCRIPTION: Continuation of Music 297.

**Course Outcomes**

- Students build on the fundamentals of sight singing 1,2 and 3.

3. Complete one course from the following:

MUSIC 235A : Instrumental Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct an instrumental performance ensemble.

**Course Outcomes**

- Students will develop the physical techniques and interpretive skills required to be an instrumental conductor.
- Students will be able to:--Explain and demonstrate the conductor's correct posture, stance, baton grip, and hand/arm position.--Explain and demonstrate the conductor's preparatory gesture, ictus, rebound, the conducting patterns.--Demonstrate expressive and ambidextrous use of both hands as it relates to the musical score.--Conduct in various articulation styles, legato, staccato, marcato, & tenuto--Conduct clear beat patterns, mixed meter, subdivision, and cuing technique.--Define musical terms as useful for a conductor., and understand/explain the transpositions of instruments found within a musical score.--Convincingly conduct a variety of musical excerpts

MUSIC 235B : Choral Conducting Techniques. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status, C- or higher in Music 194, 196, 198.

DESCRIPTION: Physical techniques and musical understanding required to conduct a choral performance ensemble.

**Course Outcomes**

- Students will demonstrate in their own conducting an understanding of and proficiency with the following techniques: beat patterns, style (legato/marcato), the conducting field, breath releases, melding, the SuperClick, subdivision of beats, fermatas, dynamics, cuing, phrase shaping, irregular meters, and multi metrics.

4. Complete eight hours of the following:

MUSIC 260R : Performance Instruction. (.5-2:1:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status.

DESCRIPTION: Private instruction and studio class.

NOTE: From one to four hours of daily practice. Fee.

**Course Outcomes**

- By preparing for and attending weekly lessons, students will develop their technique, and strengthen their interpretive skills.

7. Complete one hour of ensemble each semester for six semesters, including two or four hours from Category 1: Approved Large Ensembles (see General Information) and two or four hours of the Category 2 ensemble Music 344R; each two hours of 344R must be taken in consecutive fall and winter semesters.

8. Complete the following upper-division music core courses:

MUSIC 301 : Survey of Music Literature 1. (2:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.

DESCRIPTION: Survey of musical genres, forms, styles, and performance practices from antiquity to the Enlightenment.

**Course Outcomes**

There are no course outcomes available

MUSIC 302 : Survey of Music Literature 2. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 and 202, or equivalent.

DESCRIPTION: Survey of musical genres, forms, styles, and performance practices in the 18th and 19th centuries.

**Course Outcomes**

There are no course outcomes available

MUSIC 303 : Survey of Music Literature 3. (2:2:0)

WHEN TAUGHT: Fall; Winter; Summer Contact Department

PREREQUISITE: MUSIC 294 & MUSIC 296 & MUSIC 298; Music major status; Music 201 & 202, or equivalent.

DESCRIPTION: Survey of music genres, forms, styles, and performance practices from the late Romantic era to the present.

**Course Outcomes**

There are no course outcomes available

MUSIC 395 : Form and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: C- or higher in Music 293, 295.

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

9. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Exploration of music making from a global perspective.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods

through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Survey of jazz history, emphasizing periods, styles, and artists through the analysis of published transcriptions and arrangements.

**Course Outcomes**

- Master an assigned repertory of classic jazz recordings
- Be able to describe the main differences between important styles and artists
- Learn to transcribe and analyze jazz solos

10. Complete the following:

MUSIC 264 : Keyboard Foundations 1. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 194 & MUSIC 198 & MUSIC 260R

DESCRIPTION: Sight-reading, harmonization, improvisation, and technique at the keyboard.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

MUSIC 265 : Keyboard Foundations 2. (2:2:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MUSIC 264

DESCRIPTION: Continuation of Music 264.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world including: Sightreading, Modulation, Open Score Reading, Figured Bass, Transposition and Fakebook Improvisation.

MUSIC 364 : Keyboard Pedagogy. (2:2:1)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 249; Junior standing and successful completion of Music 249.

DESCRIPTION: Basic pedagogical principles as applied to keyboard instruments.

**Course Outcomes**

- The objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.
- Through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

MUSIC 365 : Piano Pedagogy. (2:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: MUSIC 364

DESCRIPTION: Preparation for supervised private or group teaching.

**Course Outcomes**

- As a continuation of Music 364, the objective of this course is to provide a foundation for teaching private piano to students, to increase the students' ability to utilize the various piano courses and techniques that will help provide basic skills for the art.
- As a continuation of Music 364, through reading about successful methods and teachers, and listening to lectures the students will gain the necessary background for becoming good teachers and beginning a career as a professional teacher in their own established studio.

MUSIC 403A : Piano Literature. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.

DESCRIPTION: Survey of literature. Research in area of concentration.

**Course Outcomes**

- This course is designed for the advanced keyboard performer, and consists of projects in keyboard harmony, sight-reading, transposition, modulation, improvisation, playing by ear, and score reading, in pursuit of developing the complete keyboard fluency.

MUSIC 403B : Piano Literature. (2:2:0)

WHEN TAUGHT: Winter

PREREQUISITE: C- or higher in Music 306; acceptance into 360R or 460R, or instructor's consent.

DESCRIPTION: Continuation of Music 403A.

**Course Outcomes**

- This course will explore piano literature from late Classical, Romantic, Impressionistic, and Contemporary periods of music history including composer surveys, analysis, aural and score recognition, performances and performance practices. The goal of this course is for each student to gain a broad understanding of the subject and develop a love for the rich heritage of the medium. A major purpose of the course is to instill in students a curiosity essential for lifetime discovery. Thorough knowledge and appreciation of the piano repertoire is crucial for a successful career in performance and teaching.

11. Complete two hours of the following:

MUSIC 470R : Keyboard Teaching Practicum. (1:0:3)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Completion of required pedagogy class or instructor's consent.

DESCRIPTION: Applying pedagogical principles to teaching.

**Course Outcomes**

No outcomes are available at this time.

: Keyboard Teaching Practicum: Piano.

**Course Outcomes**

: Keyboard Teaching Practicum: Organ.

**Course Outcomes**

12. Complete the following:

MUSIC 469 : Theory and Methods of Studio Teaching. (1:1:0)

WHEN TAUGHT: Winter

PREREQUISITE: Completion of required pedagogy class or instructor's consent.

DESCRIPTION: Applying learning theory and secondary education methods to studio teaching.

**Course Outcomes**

- Students will gain a theoretical base in beginning and maintaining a successful studio.

13. Complete four hours of the following:

MUSIC 115 : Basic Organ Skills. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Class instruction in organ for nonmusic majors.

**Course Outcomes**

- Students will be able to prepare and play four-part hymns to a high standard.
- Students will be able to know and apply basic principles of organ registration and construction.
- Students will be able to listen in both practice and performance for perfect legato, precise releases, and independence of line.
- Students will be able to use the standard legato manual and pedal techniques fluently, and to play simple pedal parts in combination with elementary manual parts.
- Students will learn use efficient practice techniques.
- To experience (primarily through listening) a wide range of organ repertoire with three main goals: 1) identify registrational characteristics, 2) identify pieces of interest for future learning, and 3) distinguish between that which might be appropriate for worship and that which is appropriate for concert use.

MUSIC 116R : Organ Techniques and Literature. (2:2:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: Music 115 or instructor's consent.

DESCRIPTION: Continuation of Music 115.

**Course Outcomes**

- Understand and be able to employ various advanced hymn playing techniques.
- Learn at least two organ pieces this semester. Also, experience a wide range of organ repertoire with four main goals: associate selected organ masterworks with their respective composers, regions, and time periods; identify registrational characteristics; identify pieces of interest for future learning; and distinguish between that which might be appropriate for worship and that which is appropriate for concert use.
- Understand and apply more advanced principles of organ registration.
- Understand basics of touch, phrasing and articulation, and to know how to utilize them to enhance the expressiveness of a piece of music.
- Develop fluency in manual techniques, including finger independence, redistribution, finger crossings, glissando, and substitution; and develop greater fluency in pedal playing.
- Develop basic accompanying skills on the organ.
- Cultivate more efficient practice techniques.

MUSIC 260R : Performance Instruction. (.5-2:1:1)

WHEN TAUGHT: Fall; Winter; Spring

PREREQUISITE: Music major status.

DESCRIPTION: Private instruction and studio class.

NOTE: From one to four hours of daily practice. Fee.

**Course Outcomes**

- By preparing for and attending weekly lessons, students will develop their technique, and strengthen their interpretive skills.

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal

structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

7. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

7. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

DESCRIPTION: Exploration of music making from a global perspective.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)

DESCRIPTION: Analytical study of forms from the common-practice period, including baroque contrapuntal structures and instrumental forms, classical sonata cycle, and romantic part forms.

**Course Outcomes**

- This course teaches the formal techniques of western music primarily from the 17th through 21st centuries.The specific repertoire and analytical methods you will be expected to master, or the knowledge (theoretical, historical, practical) you will be expected to acquire in any given section of this course may vary from professor to professor. That reflects the nature of a university and the privilege of academic freedom, which despite arbitrary (and actuarial) attempts to curb it, must prevail.

8. Complete one course from the following:

MUSIC 307 : World Music. (2:2:0)
WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.
DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

MUSIC 308 : History of Jazz. (2:2:0)
WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: MUSIC 194 & MUSIC 196 & MUSIC 198; Music major status; Music 201, 202 or equivalent.

MUSIC 190 : Music Fundamentals. (2:2:0)
WHEN TAUGHT: Fall; Winter
PREREQUISITE: Nonmusic major status.
DESCRIPTION: Organizational systems of music, their notation and aural patterns.
NOTE: Required for music minor.

**Course Outcomes**

- Students will learn the fundamentals of music theory and harmony. This course also helps prepare them for the music major aural skills test.

MUSIC 193 : Dictation 1. (1:0:2)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 195.
DESCRIPTION: Development of aural skills through melodic, rhythmic, and harmonic dictation.

**Course Outcomes**

- At the conclusion of this course, you should be able to aurally identify intervals, triads, and scales. You will also be expected to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the outer voices of primary harmonic progressions and identify them by roman and arabic numerals.

MUSIC 194 : Dictation 2. (1:0:2)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 193; concurrent enrollment in Music 196.
DESCRIPTION: Continuation of Music 193.

**Course Outcomes**

- Continues dictation training in diatonic harmony. At the end of this course you should be able to aurally identify intervals, triads, and scales and also to write out rhythms and melodies up to four bars in length. Finally, you will be asked to write the four voices of diatonic harmonic progressions and identify them by roman and arabic numerals.

MUSIC 195 : Music Theory 1. (3:3:0)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major; concurrent enrollment in Music 193.
DESCRIPTION: Writing and analysis in diatonic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in primary harmony (the three basic chords within keys in tonal harmony).

MUSIC 196 : Music Theory 2. (3:3:0)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 195; concurrent enrollment in 194.
DESCRIPTION: Writing and analysis in diatonic and chromatic harmony.

**Course Outcomes**

- Students will be able to part-write (using figured bass, melodic harmonization, etc.) and analyze (using roman and arabic numerals) in a full range of diatonic harmony. Students will also be able to apply the same techniques to elementary chromatic harmony (secondary dominants and common chord modulations).

MUSIC 197 : Sight Singing 1. (.5:0:1)
WHEN TAUGHT: Fall; Spring
PREREQUISITE: Acceptance as a music major.
DESCRIPTION: Rhythm and pitch-reading skills using two systems of counting and melodic solfeggio singing with hand signs.

**Course Outcomes**

- Students will demonstrate ability to sight-sing, and show mastery of McHose and Gordon counting systems, Curwen hand signs, and solfege moveable do at level 1.

MUSIC 198 : Sight Singing 2. (.5:0:1)
WHEN TAUGHT: Winter; Summer
PREREQUISITE: C- or higher in Music 197.
DESCRIPTION: Continuation of Music 197.

**Course Outcomes**

- students will demonstrate ability to sight-sing and mastery of Gordon and McHose counting systems, Curwen hand signs and solfege at level 2 ability.

DESCRIPTION: Music technology concept, principles, and applications. Foundation course in Commercial Music core.

**Course Outcomes**

- Students are introduced to the basics of hardware and software technology used in commerical music production. They will demonstrate a working knowledge of sequencing and notation programs.

MUSIC 252 : Music Technology 2. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: MUSIC 251

DESCRIPTION: Continuation of Music 251. Music technology concept, principles, and applications.

**Course Outcomes**

- Continuation of Music 251 with more exposure and application of music technology

MUSIC 256 : Recording Studio 1. (2:2:2)

WHEN TAUGHT: Winter

PREREQUISITE: MUSIC 252

DESCRIPTION: Basic recording theory, operational techniques, and procedures.

**Course Outcomes**

- Student will become familiar with basic audio technology: microphones, monitors, mixers, signal processors, digital audio workstations, audio recorders, etc.
- Student will achieve an intermediate-level of proficiency in audio production techniques, workflows, processes, common tasks, etc.
- Student will develop a sense of the aesthetic values commonly applied to music production.
- This course focuses on experimentation in the studio. Many audio concepts are best understood and appreciated (and greater learning results are achieved) from hands-on demonstration and operation of the involved technology.

MUSIC 257 : Recording Studio 2. (2:2:2)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 256

DESCRIPTION: Continuation of Music 256.

**Course Outcomes**

- Student will become familiar with basic audio technology: microphones, monitors, mixers, signal processors, digital audio workstations, audio recorders, etc.

**Course Outcomes**

MUSIC 261 : Contemporary Vocal Techniques. (2:2:1)

WHEN TAUGHT: Winter

PREREQUISITE: Music 161 or instructor's consent.

DESCRIPTION: Contemporary vocal styles and techniques, including pop/belt, stage, and studio singing.

**Course Outcomes**

- Students will work on, memorize and perform five song excerpts (Two "classical/legit", [one pre 1966 and one, post 1966] pieces from Musical Theatre literature, two mix/belt pieces from Musical Theatre literature and one Mozart aria. Focus will be on technique, musicianship and interpretation.
- Students will use musical skill to create coherent 16 bar audition cuts for each of the assigned Musical Theatre pieces
- Students will enlarge and demonstrate knowledge of vocal anatomy and proper singing technique through a series of quizzes based on information in text
- Students will enlarge knowledge of Musical Theatre literature by creating a literature list to include, but not limited to, all of the music performed in class.
- Students will evaluate their own, in class performances by observing video recordings and writing evaluations.
- Through class discussion and personal reflection (journal writing,) students will create a vision for their place in the professional Musical Theatre industry and how best to incorporate the aims of a BYU education into that vision.
- Students will evaluate in class performances of peers attending to technique, musicality and communication.
- Students will develop the ability to analyze and explain concepts and principles of voice production through working one on one with peers in teacher/ student assignments.
- Students will keep a journal designed to focus on the importance of maintaining strong moral, ethical and spiritual values while functioning within the professional world.

MUSIC 264 : Keyboard Foundations 1. (2:2:0)

WHEN TAUGHT: Fall

PREREQUISITE: MUSIC 194 & MUSIC 198 & MUSIC 260R

DESCRIPTION: Sight-reading, harmonization, improvisation, and technique at the keyboard.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world. Many of these skills will draw on the student's knowledge of music theory and become the concrete application of that knowledge.As keyboard players –they are expected to have the strongest working knowledge of harmony, as the instrument is polyphonic in nature – not homophonic. The ability to see many notes and instantly divide them into harmonic groupings is crucial and a common denominator for nearly every aspect of this class. Sometimes this grouping skill will include adding or subtracting notes from the page, or supplying notes that are only notated by a symbol. Very often students can play their performance repertoire wonderfully, but are virtually helpless and intimidated when attempting to add or subtract some of their own notes when not written specifically on the page. This tendency represents incomplete musicianship - it is instead only well trained muscles. The outcomes for this course include sight

reading, modulation, score reading, figured bass, transposition and improvisation. After discussing other items that would be considered foundational material for keyboard players in 2012, it was decided that added emphasis would be given to the history of great pianists.

MUSIC 265 : Keyboard Foundations 2. (2:2:0)

WHEN TAUGHT: Winter; Spring

PREREQUISITE: MUSIC 264

DESCRIPTION: Continuation of Music 264.

**Course Outcomes**

- The goal of 264/265 is to give students a strong introduction to various musical skills that they will very likely come across in the professional world including: Sightreading, Modulation, Open Score Reading, Figured Bass, Transposition and Fakebook Improvisation.

MUSIC 271 : Musicality in the Elementary School. (3:2:1)

PREREQUISITE: Acceptance into the Music Education: Elementary Education Emphasis program.

DESCRIPTION: Exploration of music making from a global perspective.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Students will be able to demonstrate an understanding of the methods of musical creativity in several non-Western cultures, including various approaches to melodic, rhythmic, timbral, and formal organization.They will also be able to identify various musical instruments as well as the methods through which various cultures conceptualize and taxonomize instruments, and be able to show an understanding of how various modes of musical transmission (oral tradition, notation, media) affect musical practices over time.
- Students will articulate how a culture's values can be embodied and discerned within musical practices.Students will learn how music's organizational principles (see the previous learning outcome) can be mapped onto various non-musical aspects of that culture. In other words, students will be able to observe and articulate how the way a musicsounds relates to what that music means. Some areas of exploration related to this learning outcome could include:musical practices in various cultures that project power and legitimacy within political contextsmusical practices in various cultures that reinforce social cohesion in a community contextmusical practices in various cultures that convey reverence or worship in a religious contextIn discussions, assignments, and essays, students will use this concept of "cross-domain mapping" to articulate the connection between sound and meaning in various musical contexts. They will also use this as a basis to for written self-reflection:How does the music the students themselves use in personal, social, and religious contexts resonate with their personal, community, and religious beliefs and values?How do LDS musical practices, for example, reflect, shape, and strengthen Mormon identity?
- Students will be able to articulate and demonstrate how the discipline of ethnomusicology and the scholarly methods it entails foster cross-cultural awareness, understanding, and empathy.Students will fulfill this objective by reading about the history and practices of ethnomusicology as an academic discipline, studying the methods and ethical considerations applied in ethnomusicological fieldwork, writing about their findings in assignments and exam essays, and completing a review of a scholarly monograph based on ethnomusicological fieldwork. Students will articulate in a written essay how the goals, methodologies, and ethical standards of the discipline of ethnomusicology align with the purposes and outcomes articulated in BYU'sGlobal and Cultural Awareness Foundation Document.
- Students will demonstrate an understanding of the ways in which music reflects and contributes to large-scale international and intercultural changes.Students will examine the ways in which major changes such as colonial and postcolonial political shifts, international economic developments, new media technologies, shifting social norms, religious proselytizing, etc., affect and are affected by musical practices. Students will demonstrate an understanding of musical culture as a continual interplay of tradition, hybridization, retrenchment, and change, and will be able to draw on various specific musical case studies to reflect on the complex cultural issues globalism raises. These case studies could include such things as:How various historical encounters, from the Silk Road to the Crusades to the World Fairs of the late 19th and 20th centuries, contributed to musical cross-pollination.How a Colombian soap opera helped turn a little-known provincial folk music style into an international phenomenon.How the advent of the recording industry in India dramatically changed the role of women in Indian classical music.How a Tibetan folk musician living in the U.S. balances his sense of stewardship over his tradition with the desire to broaden his audience.How members of the LDS Church throughout the world navigate the relationship between local traditional culture and shared LDS culture through the musical celebrations that precede temple dedications.Etc.

## Admission to Degree Program

Several degree programs in the Department of Theatre and Media Arts have a departmental application process with enrollment limitations. Theatre arts studies major and minor programs have declaration procedures but are open enrollment. Please see the college advisement center for specific details (1-801-422-3777).

## The Discipline

BYU's theatre programs—Theatre Arts Studies, Theatre Arts Education, and Acting—invite students to explore the possibilities theatre provides for collaboration, citizenship, service, and faith-promotion. The programs emphasize the balance between practical theatre training and critical thinking. They provide extensive opportunities for production in classroom settings, workshops, and fully-mounted productions both at BYU and external venues.

The BYU media arts program is designed to educate students on a foundation of film history, theory, and criticism, along with fundamental production competencies. Possible areas of emphasis include critical studies, fiction production and non-fiction production.

## Mission Statement

The mission of the Department of Theatre and Media Arts is to promote literacy, creativity and spirituality by exploring their interrelatedness in the arts of theatre and media, in an effort to illuminate and confirm truth and the infinite potential of the human soul.

## Career Opportunities

The theatre program provides training and experience in all areas of theatre, from performing to playwriting, from teaching to technical production.

The media arts program provides a foundation and basic experience in analyzing, conceptualizing, writing, directing, and collaboratively producing nonfiction, fiction, and new media. For skill development and specialization, students may select an area of study from the following: critical studies, fiction production, or non-fiction production.

For an area of interest study list, contact the advisement center or the department office.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

# General Information

1. The **media arts studies major (or minor)** is a limited enrollment program. Students are required to fulfill the pre-major requirement of TMA 102. See the media arts program description for details. Application must be made for entrance into the program.
2. The **theatre arts studies major (or minor)** is an open enrollment program. Students interested in general theatre studies, dramaturgy, playwriting, directing, stage management, critical studies, or design and technology (costume, lighting, makeup, scenic, or sound), should declare the theatre arts studies major (or minor), using the theatre arts studies declaration form. See program description for details on declaring this major.
3. Students interested in the **theatre arts education major** should also declare a pre-theatre arts education major using the theatre arts education pre-major declaration form. Declaring the pre-major doesn't guarantee entrance into the theatre arts education program. Students must fulfill particular requirements. See program description for details.
4. Students interested in **BFA acting** (unless they have already been accepted into the program) should declare the acting pre-major, using the acting pre-major declaration form. Declaring the pre-major doesn't guarantee entrance into the BFA program. The BFA acting program is a limited enrollment program, and students must fulfill particular requirements. See program description for details.
5. The **animation** and **music dance theatre** (MDT) limited enrollment programs are administered out of other departments. Students interested in animation will need to contact the Visual Arts Department. Students interested in MDT need to declare a pre-music major.
6. Students who are majors, minors, or pre-majors of TMA affiliated programs are eligible to receive a TMA discount card that enables them to attend theatre season performances at a reduced price. TMA discount cards are available at the front desk of the TMA Office in D-581 HFAC.

## Program Requirements | View MAP | View Program Outcomes

1. Video recorded audition links are due via email by November 15. From the video entrance auditions, approximately 30 potential students are selected to attend live auditions/interviews on the Provo campus the last Saturday of January. An incoming class of about 16 students is then selected from the 30 finalists. Full audition instructions are available on the MDT website at mdt.byu.edu.
2. Pass a proficiency examination in each of the three areas at the end of each semester.
3. The School of Music requires a minimum of 40 hours to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
4. Any grade below C– in major courses is not acceptable for graduation. Dance technique courses require a minimum grade of B– for advancement to the next level.
5. Complete the following:

*This is a limited-enrollment program requiring departmental admissions approval. Please see the college advisement center for information regarding requirements for admission to this program.*

The media arts studies program produces students with a strong liberal arts foundation that can be used effectively in a variety of film-related careers or graduate studies. Graduates are generalists with skills and proficiencies that can be used in multiple venues including emerging media environments. Students master knowledge of film culture, history, and theory; develop general and specialized skills sets; and utilize processes that integrate professional practices, generate creative applications to new situations, and support collaboration in multiple settings. Core curriculum of critical studies develops analytical skills and creates a foundation for application and experimentation; a range of electives allows additional emphasis in critical studies, fiction or non-fiction production, or other specialized areas.

Hide All Course Descriptions

The theatre arts studies major is an open enrollment program that provides a strong liberal arts foundation that can be used effectively in a variety of performance-related careers or graduate studies. The major provides practical training, critical thinking skills, and the development of professional ethics across the various performance disciplines. Students may focus studies in areas of interest — critical studies and dramaturgy, design and technology, directing and stage management, playwriting, or theatre for young audiences — but graduates are generalists with skills and proficiencies that can be used in multiple production venues and media environments.

## Admission to Degree Program

Admission to the Department of Visual Arts is obtained by department application after completion of the prerequisite core and a portfolio review. For further details, please refer to visualarts.byu.edu. Students will have two opportunities to apply to their program of choice—one in March and one in November. (This does not apply to the art history major, which is open enrollment.) Please see General Information below for more details, or contact the college advisement center (1-801-422-3777).

## The Discipline

The Department of Visual Arts serves five main purposes: (1) to prepare competent professionals in various fields of the plastic and graphic arts; (2) to prepare qualified designers to solve problems inherent in two- and three-dimensional applications; (3) to train historians who can critically appraise works of art; (4) to prepare art educators for teaching the visual arts at the elementary and secondary levels; and (5) to generally develop individuals' aesthetic sense by helping them experience art.

## Career Opportunities

The art education degree certifies the student as an art specialist in public or private institutions, grades K–12. Other opportunities for the certified art specialist are in foreign school systems, recreation programs, art museum education programs, and galleries. Students qualify for positions in artist-in-the-schools programs and arts councils and as art consultants/coordinators. The degree also provides a foundation for graduate study leading to advanced degrees.

Most opportunities for careers related to art history exist in teaching at the junior college and university levels. The art history major traditionally prepares students for related graduate study, but it also provides excellent training for many art- and humanities-related careers and provides a solid foundation for entering several professional graduate programs.

The art history major is valuable for those going into any aspect of museum work, including art conservation/restoration, curatorial work, museum research, and museum youth education programs. It is also a useful and often key undergraduate major for careers in art law, architecture, historical restoration, art galleries, auction houses, and art resource/research library studies. Local, state, and federal agencies offer career possibilities related to arts and humanities councils. Combined with one of several other majors, an art history minor helps prepare the student for any number of careers.

Studio art majors are prepared to compete as freelance, self-employed artists, working through galleries, exhibitions, and museums to promote and sell their work. The MFA degree also prepares artists to teach on a college or a university level. Other career opportunities include printmaking, illustration, production crafts, teaching, gallery and museum work, computer art applications, and other related careers.

Design majors are fully prepared for careers in each of the respective disciplines—

- Graphic design: Advertising agencies, design studios, in-house design organizations, freelance in mediums such as books, posters, signage, billboards, commercials, corporate identity systems, and logos.
- Illustration: In-house or freelance illustration focusing on book jacket, editorial, corporate, or institutional work; advertising, children's books, concept design, character development, narrative traditions, and computer applications, among others.
- Photography: Portraiture; commercial illustration; advertising; fashion; architectural photography; photo-journalism; editorial, stock, industrial, fine art, educational, medical, and travel photography; photographic conservation, marketing and manufacturing, and finishing.
- Animation majors are prepared to work in various disciplines that include feature animation studios, visual and special effect studios, entertainment, computer games, and scientific data visualization.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- Earn a minimum of 120 credit hours
- Have a cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

## General Information

### Prerequisite Core

All prospective 2D studio 3D studio, art education, graphic design, illustration, and photography students must complete the freshman core program before applying to the Department of Visual Arts. The freshman core will consist of the following open-enrollment courses: VA 111, 114, 115.

Prospective animation students must complete the following courses before applying to a degree program in the department: CSAnm 150, VAAnm 131, and VAAnm 160.

Art history is an open-enrollment program.

### Talent Awards

All students, pre-majors and accepted majors, may apply for talent awards by completing the application found online at http://visualarts.byu.edu/. The deadline for talent award applications is February 1st of every year.

### Application Procedures for Freshmen

High school students expecting to be admitted to BYU in Fall semester may apply for the talent award and can be accepted only once a year (February 1st). If accepted to the Visual Arts program through the talent award, then the student would be expected to enroll in the core that first Fall semester and complete the pre-requisite classes.

### Sophomore-Through-Senior BFA Degree Program Enrollment

Permission to enroll for sophomore-through-senior-level BFA degree program courses is granted to students upon satisfactory development of skills and creative abilities demonstrated in a portfolio of drawings and designs completed during the preceding year. Faculty from each major will assess portfolios of work submitted by students wishing to advance in their respective fields of study. Students invited to continue are permitted to enroll in specified courses at the next academic level.

### Transfer Students

Transfer students in art disciplines must meet with the appropriate area coordinator. Transfer students in design disciplines are required to participate in a portfolio review; the deadline is March 15 for Fall semester, Spring and Summer terms, and November 15 for Winter semester. Contact the area coordinator.

**Note:** Students not accepted into BFA degree programs may elect to enroll in one of the bachelor of arts programs in visual arts. Students may apply to the BFA program no more than twice.

### Degree Program Coordinators / Advisors

Coordinators are appointed to counsel students in each of the eight majors/emphases. Coordinators will advise students about program objectives, course content and sequence, career goals, and other matters pertaining to their major field of study.

### Department Probationary Status

Students can be placed on probationary status for the following:

1. Inadequate academic performance.
2. Unprofessional attitude and lack of commitment.
3. BYU Honor Code violations.

## Licensure Option

The BA and BFA are professional degrees. This non-degree licensure option is only available to the following Visual Arts majors:

Required of all majors in the visual arts (except art history), the visual arts core is a predisciplinary preparation that embraces knowledge and skills from each discipline and underlying principles common to all disciplines. The core is designed to serve students more efficiently by facilitating their progress through the visual arts programs and allowing flexibility in choosing their individual program direction. The core enables students to acquire a basic and broad understanding of the visual arts before engaging in the specific discipline's content and modes of inquiry.

## What Are the Humanities?

The College of Humanities houses programs that study literature and language as well as philosophy, critical reading, and writing. Those programs share a concern with the processes and products of human expression. In doing so, they focus on a quest for fluency in what has been called "the human conversation"—the ongoing inquiry into what it means to be human.

Study in the humanities disciplines develops facility in languages and cultures as well as higher order cognitive abilities needed for interpretation, analytical thinking and reflection, criticism, and writing. Students can apply what they are learning prior to graduation and enrich their capacities for satisfying careers and productive lives as educated citizens after.

## College Advisement Center

David Waddell, Assistant Dean
1175 JFSB
(801) 422-4789
Email: humanities-advisement@byu.edu
Website: http://humanities.byu.edu/advisement/

The advisement center supports students in achieving their academic and career goals by providing guidance and direction in academic and career exploration, progress toward timely graduation, and experiential learning through Humanities+ experiences. Those experiences include internships, faculty mentoring, secondary majors, minors, participation in clubs, and other professionally relevant experience.

## Center for Language Studies

Ray T. Clifford, Director
Agnes Welch, Program Manager
3086 JFSB
(801) 422-1201
Website: http://cls.byu.edu

The Center for Language Studies works with other College departments to help students from all of the University's academic disciplines acquire the advanced language and cultural skills they need for personal enrichment and for global careers. Particular emphasis is placed on:

- Teaching advanced language classes in low-enrollment languages spoken by returned missionaries.
- Testing language proficiency.
- Conducting language acquisition research.

# The Humanities Center

Matthew Wickman, Senior Fellow and Director
4103 JFSB
801-422-1664
Website: http://humanitiescenter.byu.edu

The Humanities Center is an institute of intensive learning and outreach that promotes the exchange of ideas within the humanities and across the arts and sciences. It aims to foster excellent research and teaching in the humanities, encourage discussion and collaboration across departments, colleges, and universities on matters of public as well as academic concern and enhance BYU's global reputation for scholarship, teaching, and public service.

## Admission to Program

The American Studies degree program is open enrollment.

## The Discipline

The American Studies major examines the sweep of American experience, society, culture, and civilization from a variety of viewpoints—literature, history, gender, humanities, regions, politics, ethnic groups, geography, art, economics, religion, and folklore—based in core courses designed to examine the American experience from a variety of standpoints. Majors are encouraged to develop particular skills in writing; literary criticism; historical research; and social, political, and economic analysis. The program provides not only rich interdisciplinary experience but also exposure to a variety of excellent scholars and teachers.

## Career Opportunities

On graduation, American Studies students are usually qualified to enter graduate and professional schools (for law, MBA, MPA, PhD), government or community service, or advanced graduate studies in the liberal arts, including American studies, American civilization, American culture, American history, and American literature.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

SOC 323 : Racial and Minority-Group Relations. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Social psychological and social structural analysis of racial and ethnic relations; prejudice, discrimination, responses, protests, current issues.

**Course Outcomes**

- Demonstrate how the continuing influence and changing meaning of ethnic heritage is bound up in contemporary western culture, both as experienced by others and in their own lives.
- Describe the role of childhood in the construction of moral adulthood, and identify the community consequences of connections and continuity in the life course, as opposed to alienation and boundedness.
- Identify sources of intellectual and personal balance and of communal and personal strength in dealing with problems of cultural identity and social diversity.
- Identify strengths and weaknesses in varying subcultures, including our own, to highlight sources of self deception, and to propose personal and community actions whereby our â woundsâ may be healed.
- Describe relationships between Americaâ s history of slavery, our own attitudes toward essential work and those who perform it, and existing racist and sexist attitudes.
- Offer proposals whereby the harmonizing of social opposites can be achieved.

Understand the consequences, positive and negative, of ethnic contact and interaction on social creativity and problem solving, and to identify consequences of such contact in their own lives.
- Identify historical examples of positive and negative ethnic contact, in terms of social innovation and creativity, and apply them to contemporary situations
- Describe the complexities of social change and social engineering, cite historical examples in which efforts at social improvement generated unanticipated and sometimes counterproductive effects, and anticipate such effects in their own efforts at personal and social improvement.
- Clarify the differences between race and ethnicity, and the effects of so categorizing our fellow humans.
- Portray the â crisisâ contemporary civilizations face in terms of the age-old tension between settled and tribal peoples, and propose actions to ameliorate the negative effects of detribalization and the continuing increase in social diversity.
- Have a working understanding of the nature and limitations of prevailing worldviews, especially modernism and postmodernism, and their relation to social morality. Students understand the present-day significance of the Holocaust and other instances of genocide in terms of their lessons for humanity. They can identify the advantages and limits of reason and rationality, and understand that rationality and ethics may point in opposite directions, with potentially disastrous consequences for minorities.
- Demonstrate a basic familiarity with the ethnic structure of American society, how it is changing, and its implications for the future.

SOC 327 : Sociology of the LDS Church and Its People. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: The LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

**Course Outcomes**

- Students become “conversant with the substantive areas of sociology and the variety of theories and research methods associated with these substantive areas,” as they apply to the sociology of religion in general and the sociology of Latter-day Saint life in particular. They learn several of the “major controversies and debates, new developments, emerging issues, and current trends” as they impact the study and interpretation of Latter-day Saint life in the contemporary academic and intellectual world. Students also are helped “to critically assess the strengths and weaknesses of current sociological theories and research relating to substantive areas,” in this case Latter-day Saint life both historically and in the 20th and 21st centuries.
- Students have direct experience in comparative analysis both at the individual and group level, in interpersonal contexts as well as in vicarious and analytical experience, whereby they learn “the limitations of extrapolating from their own experience” and confront “how the life experience of others may differ from their own,” both within social categories (e.g., comparisons with the life experience of other Latter-day Saints) and across social boundaries (e.g., comparisons with members of other faiths or national populations). Students experience “how race, class, and/or gender intersect with other social categories,” in this instance, religious membership or national identities, “to create a variety of life experiences.” They also learn to “articulate the sources of social conflict and describe the relations of power in modern society” as they consider both the history of the often-hated minority that was the Latter-day Saints and the contemporary setting and participation of Latter-day Saint people in modern and postmodern society.
- Students consider the underlying assumptions and “basic ideas and arguments forming sociological inquiry” as they apply to the sociology of religious life, especially the experience of Mormon people and Mormondom generally. Conflict theory, functionalism, social psychological perspectives, demographic perspectives are all brought into play as they affect the study of Latter-day Saint culture. Special attention is paid to the differences between postmodern and modern theoretical perspectives as they impact definitions of “truth” and “reality” and as they apply to theorizing about and doing research on people's ideas of religion and transcendence.
- Diversity of research methodologies are illustrated; the “fit” of various approaches to the study of religious life are evaluated. This is not a methods course, but as issues of research methodology affect the confidence one can have in the findings of researchers who study Mormonism, issues of methodology are discussed and we learn to distinguish good from poor research.
- Because our focus is social science literature on Mormonism across more than a century, the emphasis on “current” is limited, but because many of our readings and several of the “classics” students review are current, we contribute in part to awareness of the current state of social science analysis of religion, and Mormonism in particular. Students demonstrate their knowledge of substantive areas as applicable to research on LDS populations in their critiques of “classic” sociological studies of Mormonism, ideally demonstrating both the strong points and weaknesses of high quality and/or high profile studies of Mormon thought, life, and people.
- Both the advantages and the disadvantages of sociological perspectives (the plural here is important; there are many social science perspectives, and to speak of the sociological perspective is a distortion) with respect to interpreting daily life and religious life are emphasized throughout the course. Dilemmas and challenges of trying to live an integrated spiritual and successful temporal existence within contemporary societies are stressed throughout the course. Throughout, we stress the importance to the religious life of systematic, honest, and sophisticated awareness of intellectual fads and foibles, changing trends and worldviews, varying standards and assumptions, patterns of globalization and secularization. More than many sociological courses, this one is devoted to the overall aim of BYU education to integrate spiritual and secular life goals and interest, to combine professional and career interests with a more specialized awareness of how religious organizations, beliefs, and institutions fit within and change along with the wider society, and the challenges associated with the sometime conflict of individual, family, organizational and societal interests.

**Note 1:** Engl 358R and 395R, as well as the humanities courses, must be topics in an American subject.

**Note 2:** Course substitutions may be made only with written, prior permission of the American Studies coordinator.

**Note 3:** Students may substitute up to six credit hours of approved internship credit for up to six hours of American Studies electives, including Washington, D.C. seminar credits.

6. Complete the following during the senior year before graduation:

AM ST 490 : Senior Capstone. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: AM ST 303 & AM ST 304; Senior status or program coordinator's consent.

DESCRIPTION: In-depth review of American Studies theories, methods, and criticism; content varies; requires original research and substantial writing of paper intended for publication.

**Course Outcomes**

- Through class discussions and writing activities, students will be able to demonstrate a fluency in the disciplinary trends of American Studies, an understanding of the field's inherent interdisciplinarity, and an ability to draw upon knowledge that they have acquired in courses taken in other disciplines.
- Students will be able to demonstrate high proficiency in reading critically and analyzing primary historical, secondary historical, theoretical, and critical texts. Students will exhibit this high proficiency through engaging in the methods central to the field of American Studies: textual analysis, archive building, institutional contextualization, and theorizing.
- Capstone participants will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language, style, and the best practices of the discipline.
- Students will be able to develop their own research project (formulate a sophisticated research question, independently conduct primary and secondary research, and employ the writing skills they have developed over the course of the major) in order to write an original 15–20 page research paper in the last third of the course.

*Hours include courses that may fulfill university core requirements.

**Course Outcomes**

- Students will be able to employ disciplinary and interdisciplinary perspectives to address a key problem or question in American culture.
- Students will, in a variety of written assignments, rigorously analyze cultural and textual research sources.
- Students will be able to communicate persuasively in oral and written forms following the conventions of the field.

AM ST 392R : American Studies Lecture Series: Presentations on American Studies/Western American Studies. (1:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduce research in American Studies and Western American Studies. Speakers from BYU and other institutions share their research. Students engage with lecturers by developing questions, then evaluate and write about ideas.

**Course Outcomes**

- Students will be introduced to the latest research in American Studies and Western American Studies by attending a weekly lecture series.
- Students will be able engage with the lecturers by asking questions and responding to teach lecture.
- Students will be able to evaluate and write clearly about the ideas presented in the lectures.

AM ST 399R : Academic Internship. (.5-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Program coordinator's consent.

DESCRIPTION: Examining the American experience from a variety of standpoints. Honing skills in writing; literary criticism; historical research; and social, political, and economic analysis.

**Course Outcomes**

- Using available resources, students will be able to work independently to arrange and complete an internship that will help them explore post-graduation career possibilities.
- Students will be able to analyze and act in accord with the conventions, texts, and/or artifacts of the field in which they arrange their internship; they will develop a fuller understanding of regional, national, and/or international modes of American experience.
- Students will improve their oral and written skills according to the best practices of the internship situation in which they are engaged, as evaluated by internship supervisors and coordinators.

### 400-Level Courses

AM ST 490 : Senior Capstone. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: AM ST 303 & AM ST 304; Senior status or program coordinator's consent.

DESCRIPTION: In-depth review of American Studies theories, methods, and criticism; content varies; requires original research and substantial writing of paper intended for publication.

**Course Outcomes**

- Through class discussions and writing activities, students will be able to demonstrate a fluency in the disciplinary trends of American Studies, an understanding of the field's inherent interdisciplinarity, and an ability to draw upon knowledge that they have acquired in courses taken in other disciplines.
- Students will be able to demonstrate high proficiency in reading critically and analyzing primary historical, secondary historical, theoretical, and critical texts. Students will exhibit this high proficiency through engaging in the methods central to the field of American Studies: textual analysis, archive building, institutional contextualization, and theorizing.
- Capstone participants will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language, style, and the best practices of the discipline.
- Students will be able to develop their own research project (formulate a sophisticated research question, independently conduct primary and secondary research, and employ the writing skills they have developed over the course of the major) in order to write an original 15–20 page research paper in the last third of the course.

# Western American Studies

## The Discipline

The Western American Studies minor builds upon the expertise of BYU faculty, applying the insights of several disciplines to achieve an overarching understanding of the region. The minor involves coursework in four areas: natural environment, human heritage, social environment, and arts and literature. The minor facilitates an interdisciplinary perspective. In the "real world," research often crosses disciplinary boundaries. For example, a team of experts from fields including the social sciences, history, geography, botany, range science, and zoology often work with a technical writer to create a policy statement. If all team members have a basic understanding of the other disciplines, it promotes better research and understanding. Students interested in issues relating to the West may find the cross-disciplinary approach helpful in their preparation for advanced studies or employment. Minors may also obtain credit for an approved internship. Through this minor, students interested in any region of the world can learn how to apply techniques from a variety of disciplines to regional studies.

## Program Requirements

1. Complete the following:

AM ST 300 : Literature and Cultures of the American West. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Literature and cultural representations of the American West and the frontier.

**Course Outcomes**

- Students will be able to cite major texts of western American literature and theory to support logical arguments about western literature and culture.
- Students will be able to place a variety of western literary texts within historical, religious, environmental, social, and literary contexts, considering the American West as a distinct US region and as an engine in the construction of broader American and international cultures.
- Students will be able to persuasively communicate their mastery of major historical and conceptual themes and issues that are distinctive to the study of the American West demonstrating competence with written conventions of the field.

2. Complete one course from three of the following four clusters:

*Natural Environment*

GEOL 101 : Introduction to Geology. (3:2:1)

OFFERED: Honors also.

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Cultural focus on physical and environmental geology for nonscience majors; rocks and minerals. Field trips.

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- 1. Understand the difference between minerals and rocks.2. Be able to identify common rocks and minerals.3. Know where and when the basic rock and mineral types form and how they are related to the hydrologic and tectonic systems.
- 1. Understand how the hydrologic system helps to shape the Earth and how the different sub-systems interact.2. Learn the reasons for climate change in both ancient and modern times.
- 1. Learn the basic evidences and ideas that support the Theory of Plate Tectonics.2. Understand how the plate tectonic system works, including the role of the different types of plate boundaries and the forces that help to drive the system.3. Learn how the plate tectonic system has helped to shape the Earth's surface.
- 1. Gain a greater insight into the enormous length of geologic time and the evidences that support this claim.2. Learn the different ways that scientists can determine geologic ages.
- Learn how and why the other planets and moons in our solar system are different from Earth.

PWS 150 : Environmental Biology. (3:3:0)

WHEN TAUGHT: Fall; Winter; Summer

DESCRIPTION: Conservation and management of natural resources concurrent with increasing socioeconomic and human population demands; factors such as soil, water, and air pollution, resources management, bioremediation, nutrient cycles, and global climate changes

NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**

- Gain a deep appreciation for the Lord's admonition to Adam and Eve regarding the Earth to dress it and keep it
- Engage others and participate in discussions about major environmental problems, movements, and solutions (e.g., desertification, invasive species, water pollution, green revolution, and renewable energy).
- Understand how “science” is conducted.
- Demonstrate a fundamental knowledge (i.e., scientific literacy) of the environment and current environmental problems facing us locally, regionally, and globally.
- Devise experiments with testable hypotheses based the scientific method—process of making observations and logically integrating those observations into a model of how the world works.
- Foster and promote environmental stewardship within your realm of influence and your community.

PWS 215 : Principles of Range Management. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Overview of rangeland resources and management principles, including rangeland classification, multiple use management, natural resource policy, and grazing management.

**Course Outcomes**

- Describe rangeland physical characteristics, types, physiology, and ecology
- To understand the principles of stewardship and how they apply to Rangelands
- To understand the importance of rangeland grazing, how it is managed, and nutrient needs of livestock and wildlife
- Describe multiple use management and its implications to wildlife and livestock
- To improve reading and writing skills relating to scientific research

PWS 225 : Principles of Wildlife and Fisheries Management. (3:3:0)

WHEN TAUGHT: Winter

RECOMMENDED: PWS 115.

DESCRIPTION: Basic principles of fish and wildlife management, their habitats, and their human users. Ecological concepts, population dynamics, nutrition, behavior, population assessment, management strategies, habitat sampling and management.

**Course Outcomes**

- Learning Outcome #1: Identify and articulate stewardship for the creation as a basis for professional judgment.This course not only provides an understanding of tools used by wildlife and fisheries managers to restore, revive, and maintain wildlife and fish populations, but also discusses our stewardship roles and responsibilities for those aspects of the creation.
- Learning Outcome #2: Identify wildland plants, soils, and wildlife species and understand how they function in the environment.This course introduces students to a number of wildlife and fish species, and basic ecological concepts as they relate to wildlife and fisheries. Students will understand the ecological roles, habitat needs, and interactions of fish and wildlife at various levels in an ecosystem
- Learning Outcome #3: Apply an understanding of ecological processes to wildlife management.This course includes an extensive overview of basic ecological processes and how to use them for fish and wildlife management.
- Learning Outcome #4: Demonstrate the ability to apply the scientific method and analytical thinking to ecological and management issues.In this course students will be rigorously taught the scientific method and given opportunities to demonstrate the understanding through fish and wildlife management problem solving. They will have writing assignments that provide opportunities for the synthesis and expression of the depth of their understanding. The term paper required in this course may be used for one of the “three written papers relating to stewardship ethics and management situations” that will be placed in the student’s portfolio required for graduation with a Wildlife and Wildlands Conservation BS degree.

*Human Heritage*

HIST 360 : American West to 1900. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: The American West as a place of great diversity. Topics include Native American societies, European colonization, explorations, the fur trade, overland migrations, Indian relations, mining, settlement, and the environment.

**Course Outcomes**

- Students will be able to explain and interpret major developments and historical terms in the history of the American West before 1900.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

HIST 361 : The American West Since 1900. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Pivotal developments in the twentieth-century West, including urbanization, Sun Belt migration, political protest, labor history, Native American history, immigration, water policy, tourism, military-industrial complex, Hollywood.

**Course Outcomes**

- Students will be able to explain and interpret major developments and historical terms in the history of the American West since 1900.
- Students will be able to interpret primary documents and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.

*Social Environment*

ANTHR 345 : American Culture. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Perspectives and methods for making sense of mainstream middle-class American society;

American ways of being-in-the-world, of believing, behaving, and belonging; American cultural themes.

**Course Outcomes**

- Develop an enhanced understanding of what it means to be American.Learn how to use the stories Americans tell about themselves as portholes through which to peer into the ordinarily invisible world of American culture.Be able to describe the values, beliefs, and attitudes that shape and color how Americans perceive and act in the world, that inform American social and political life as well as individual psychology.Demonstrate theability to think soundly, to communicate effectively, and to write a clear and convincing memoir of a specific American experience that reveals a particular, readily identifiable aspect of American culture.

ANTHR 346 : Anthropology of Mormonism. (3:3:0)

DESCRIPTION: Intensive analysis of Mormon society and culture using a range of anthropological perspectives.

**Course Outcomes**

- Students will gain a knowledge of the development of Mormonism as a distinct religious and cultural force within American society as well as its impact in world-wide contexts. The emergence of Mormonism as a 'culture' and the evolution of its assumptions and unique cultural characteristics will also be emphasized. Students will gain practice in applying current anthropological theories to a culture familiar to the majority of participants, but perhaps never thought about by students through the disciplinary assumptions of anthropology.

ANTHR 350 : Archaeological Cultures of North America. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Cultural developments of North American Indians (Canada, U.S., and northern Mexico) before Columbus.

**Course Outcomes**

- Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.
- Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.
- Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

ECON 274 : American Economic History. (3:3:0)

PREREQUISITE: ECON 110

DESCRIPTION: Impact on households, firms, and government of America's transformation from a rural, agricultural colony to a major industrial nation.

**Course Outcomes**

There are no course outcomes available

SOC 327 : Sociology of the LDS Church and Its People. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: The LDS Church from a social science perspective, including the Church as a new religious movement; LDS culture; the institutionalization process.

**Course Outcomes**

- Students become “conversant with the substantive areas of sociology and the variety of theories and research methods associated with these substantive areas,” as they apply to the sociology of religion in general and the sociology of Latter-day Saint life in particular. They learn several of the “major controversies and debates, new developments, emerging issues, and current trends” as they impact the study and interpretation of Latter-day Saint life in the contemporary academic and intellectual world. Students also are helped “to critically assess the strengths and weaknesses of current sociological theories and research relating to substantive areas,” in this case Latter-day Saint life both historically and in the 20th and 21st centuries.
- Students have direct experience in comparative analysis both at the individual and group level, in interpersonal contexts as well as in vicarious and analytical experience, whereby they learn “the limitations of extrapolating from their own experience” and confront “how the life experience of others may differ from their own,” both within social categories (e.g., comparisons with the life experience of other Latter-day Saints) and across social boundaries (e.g., comparisons with members of other faiths or national populations). Students experience “how race, class, and/or gender intersect with other social categories,” in this instance, religious membership or national identities, “to create a variety of life experiences.” They also learn to “articulate the sources of social conflict and describe the relations of power in modern society” as they consider both the history of the often-hated minority that was the Latter-day Saints and the contemporary setting and participation of Latter-day Saint people in modern and postmodern society.
- Students consider the underlying assumptions and “basic ideas and arguments forming sociological inquiry” as they apply to the sociology of religious life, especially the experience of Mormon people and Mormondom generally. Conflict theory, functionalism, social psychological perspectives, demographic perspectives are all brought into play as they affect the study of Latter-day Saint culture. Special attention is paid to the differences between postmodern and modern theoretical perspectives as they impact definitions of “truth” and “reality” and as they apply to theorizing about and doing research on people’s ideas of religion and transcendence.
- Diversity of research methodologies are illustrated; the “fit” of various approaches to the study of

religious life are evaluated. This is not a methods course, but as issues of research methodology affect the confidence one can have in the findings of researchers who study Mormonism, issues of methodology are discussed and we learn to distinguish good from poor research.
- Because our focus is social science literature on Mormonism across more than a century, the emphasis on "current" is limited, but because many of our readings and several of the "classics" students review are current, we contribute in part to awareness of the current state of social science analysis of religion, and Mormonism in particular. Students demonstrate their knowledge of substantive areas as applicable to research on LDS populations in their critiques of "classic" sociological studies of Mormonism, ideally demonstrating both the strong points and weaknesses of high quality and/or high profile studies of Mormon thought, life, and people.
- Both the advantages and the disadvantages of sociological perspectives (the plural here is important; there are many social science perspectives, and to speak of the sociological perspective is a distortion) with respect to interpreting daily life and religious life are emphasized throughout the course. Dilemmas and challenges of trying to live an integrated spiritual and successful temporal existence within contemporary societies are stressed throughout the course. Throughout, we stress the importance to the religious life of systematic, honest, and sophisticated awareness of intellectual fads and foibles, changing trends and worldviews, varying standards and assumptions, patterns of globalization and secularization. More than many sociological courses, this one is devoted to the overall aim of BYU education to integrate spiritual and secular life goals and interest, to combine professional and career interests with a more specialized awareness of how religious organizations, beliefs, and institutions fit within and change along with the wider society, and the challenges associated with the sometime conflict of individual, family, organizational and societal interests.

*Arts and Literature*

ENGL 364 : Literature and Cultures of the American West. (3:3:0)

WHEN TAUGHT: Fall; Spring Contact Department; Summer Contact Department

PREREQUISITE: ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295

DESCRIPTION: Literature and cultural representations of the American West and the frontier.

**Course Outcomes**

- Read critically and analyze in the context of appropriate literary and cultural theories major and selected minor texts and associated with the American West.
- Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of the American West.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 368 : Literature of the Latter-day Saints. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: ENGL 251 & ENGL 295

DESCRIPTION: Fiction, poetry, drama, folklore, personal essay, and other literature emerging from the LDS experience and expressing various perspectives on it.

**Course Outcomes**

- Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class.
- Identify, locate, read critically, and analyze major and selected minor texts and associated with the Latter-Day Saints.
- Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

ENGL 392 : American Folklore. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring Contact Department; Summer Contact Department

PREREQUISITE: ENGL 251

DESCRIPTION: American folk art and literature and the historical and cultural circumstances from which they developed.

**Course Outcomes**

- Document folklore using established formats and understand some methods of recording and archiving local traditions in order to "analyze rigorously" American texts and artifacts in context and in terms of how "the American experience has been, and continues to be, constructed and transmitted."
- Identify and remember 3 categories of folklore; 4 types of folk narrative; 8 folk groups.
- Relate worldview with the performance of traditions, comparing similarities and differences of groups with differing worldviews and obtaining a wider view of American history and diversity.
- Reason intelligently in oral and written discourse while allowing that traditions are meaningful to participants in places and times different from your present circumstances.
- Work independently to connect folklore studies with other course work and life experiences and goals.
- Get excited about personal, group, and aesthetic dynamics in the performance of traditions and "question ethically" the choices and forces that help perpetuate or extinguish traditional practices, both locally and globally.

SPAN 365 : Mexican-American Culture. (3:3:0)

WHEN TAUGHT: Contact Department.

PREREQUISITE: Span 321 or concurrent enrollment.

DESCRIPTION: Contemporary culture (education, popular and fine arts, worldview, attitudes, etc.) of the Mexican-American in the U.S.

**Course Outcomes**

- Recognize and describe important cultural products, such as art, literature, architecture, and music, including important works and individuals, as pertaining to Mexican American culture.
- Describe important cultural institutions, including family and religion.
- Discuss important cultural practices, including customs, traditions, celebrations, festivals, etc
- Analyze recent cultural and social developments, including political, social, religious, and artistic events, placing them in historical context.
- Students should be able to recognize, compare, and evaluate the influence of their own cultural background on their attitudes, beliefs, and worldview, in relation to the Mexican- American world.

3. Complete additional elective courses to make a total of 18 hours. Electives may be chosen from the courses listed above that have not been used, from the additional courses listed below, or from topical courses on Western themes offered through academic departments or the Honors Program.

AM ST 390R : Topics in American Studies. (3:3:0)

DESCRIPTION: Multidisciplinary study of a carefully defined problem in American culture. Topics vary.

**Course Outcomes**

- Students will be able to employ disciplinary and interdisciplinary perspectives to address a key problem or question in American culture.
- Students will, in a variety of written assignments, rigorously analyze cultural and textual research sources.
- Students will be able to communicate persuasively in oral and written forms following the conventions of the field.

(western topics only)

AM ST 392R : American Studies Lecture Series: Presentations on American Studies/Western American Studies. (1:1:0)

WHEN TAUGHT: Fall

DESCRIPTION: Introduce research in American Studies and Western American Studies. Speakers from BYU and other institutions share their research. Students engage with lecturers by developing questions, then evaluate and write about ideas.

**Course Outcomes**

- Students will be introduced to the latest research in American Studies and Western American Studies by attending a weekly lecture series.
- Students will be able engage with the lecturers by asking questions and responding to teach lecture.
- Students will be able to evaluate and write clearly about the ideas presented in the lectures.

AM ST 399R : Academic Internship. (.5-6:0:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

PREREQUISITE: Program coordinator's consent.

DESCRIPTION: Examining the American experience from a variety of standpoints. Honing skills in writing; literary criticism; historical research; and social, political, and economic analysis.

**Course Outcomes**

- Using available resources, students will be able to work independently to arrange and complete an internship that will help them explore post-graduation career possibilities.
- Students will be able to analyze and act in accord with the conventions, texts, and/or artifacts of the field in which they arrange their internship; they will develop a fuller understanding of regional, national, and/or international modes of American experience.
- Students will improve their oral and written skills according to the best practices of the internship situation in which they are engaged, as evaluated by internship supervisors and coordinators.

(up to 6 hours with director's approval)

ANTHR 317 : Native Peoples of North America. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

DESCRIPTION: Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

**Course Outcomes**

- Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.
- Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.
- Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

ANTHR 530 : Great Basin Archaeology. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.

PREREQUISITE: Anthr 350 or equivalent.

DESCRIPTION: Overview of ethnography, history of research, and prehistory of the Great Basin culture area. Current issues in archaeological research emphasized.

**Course Outcomes**

- Students will gain archaeological and cultural knowledge of the major native peoples of the Great Basin Region from pre-history through European contact through a study of their archaeologial remains and ethnographic studies.
- Students will have hands-on experiences with the collections of the Museum of Peoples and Cultures that are representative of the cultures of the Great Basin Region.

ANTHR 535 : Southwest Seminar. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

PREREQUISITE: Anthr 350 or equivalent.

DESCRIPTION: Overview of ethnography and prehistory of American Southwest. Current issues in archaeological research emphasized.

**Course Outcomes**

There are no course outcomes available

ARTHC 345 : American Art. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: ARTHC 202

DESCRIPTION: American painting and sculpture from colonial through modern times.

**Course Outcomes**

There are no course outcomes available

GEOG 245 : Geography of Utah. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

RECOMMENDED: Geog 101,120, 130.

DESCRIPTION: Exploring geography of Utah. Topics include land forms, climate, agricultural and recreational economics, historical migration, Mormon cultural landscape, ethnic patterns, and rural-urban contrasts.

**Course Outcomes**

There are no course outcomes available

GEOG 250 : United States and Canada. (3:3:0)

WHEN TAUGHT: Fall Contact Department; Winter Contact Department

DESCRIPTION: Analysis of the natural environment, historical development, cultural patterns, economic systems, and political structures of geographic regions.

**Course Outcomes**

There are no course outcomes available

GEOG 306 : Public Land Conservation. (3:3:0)

WHEN TAUGHT: Fall

DESCRIPTION: Environmental and social geography of public lands; analyzing historical, planning, management, and ecological issues.

**Course Outcomes**

There are no course outcomes available

HIST 363 : The Spanish Frontier in North America. (3:3:0)

DESCRIPTION: Spanish exploration, occupation, and institutions of northern Mexico, the American southwest, and Florida, 1521-1821; Mexican period to 1848.

**Course Outcomes**

- Students will be able to explain and analyze the major political, economic, social, and religious developments in the history of the Spanish and Mexican northern frontier in North America between approximately 1492 and 2011
- Students will be able to analyze and interpret primary source documents
- Students will be able to interpret and debate the meanings and historical value of primary source texts with their peers.

HIST 364 : Utah. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer

DESCRIPTION: Contributions of Native Americans, explorers, mountain men, miners, government officials, Mormons, and other groups in the nineteenth century. Impact of national movements, various peoples, politics, economics, and social and cultural change in the twentieth century.

**Course Outcomes**

There are no course outcomes available

HIST 382 : Mormonism in the American Experience. (3:3:0)

WHEN TAUGHT: Winter Odd Yrs.

DESCRIPTION: Social, economic, political, intellectual, and religious environment in which Mormonism flourished; contributions of Mormon men and women to American culture and history.

**Course Outcomes**

- Students will be able to summarize and assess key aspects of how Mormonism has been situated in the larger cultural and religious geography of America
- Students will learn how particular primary sources provide key building blocks in prominent interpretations of the place of Mormonism in American history
- Students will become acquainted with, and learn to assess the academic conversation concerning Mormonism
- Students will enhance their verbal communication skills through participation in class discussion.

HIST 385 : Latinos in the United States. (3:3:0)

WHEN TAUGHT: Fall Odd Yrs.

DESCRIPTION: The place of Latin Americans within the context of U.S. history. The growth and development of the largest Latino communities from pre-colonial times to present day and how Latinos may influence future policies within the U.S.

**Course Outcomes**

- Students will learn the history of Latinos in this country beginning with the circumstances which brought them to this country, the ways they have integrated or resisted integration, and the efforts they have made to claim their rights as citizens.
- Students will learn to interpret the documents and rhetoric of this community which will help them understand the intellectual, cultural and political thought of Latinos over the last 100 years.
- Students will learn the current state of Latino social and cultural integration in the Utah community.
- Students will learn to write a major essay on the history of Latinos in order to understand the literature as well as the primary sources available on this community.

HIST 386 : Nineteenth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Fall Even Yrs.

DESCRIPTION: History of various Indian tribes, their cultures, and their relationships with European nations and the United States, including military campaigns.

**Course Outcomes**

- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture.
- Learn to communicate effectively both orally and in writing about Native American topics
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges

HIST 387 : Twentieth-Century American Indian History. (3:3:0)

WHEN TAUGHT: Winter

DESCRIPTION: Sociocultural factors that affect twentieth-century native Americans in both urban and reservation settings, including current challenges facing Indian communities.

**Course Outcomes**

- Students will be understand and appreciate Indian history and cultures, employ historical research skills effectively, and apply appropriate methods and theories to the study of Indian history and contemporary Native American issues.
- Students will be able to interpret primary sources and use evidence from those documents to support historical assertions and interpretive generalizations.
- Students will be able to skillfully and honestly evaluate historical arguments in secondary sources.
- Recognize important ideas of Indian and non-Indian cultural traditions and how LDS Native Americans have balanced their intellectual pursuits, their faith, and their culture
- Learn to communicate effectively both orally and in writing about Native American topics.
- Have meaningful interactions with Indian communities, individuals, and organizations to provide outreach and to help address contemporary challenges.

POLI 311 : State and Local Government and Politics. (3:3:0)

WHEN TAUGHT: Contact Department.

RECOMMENDED: Poli 110 or Poli 210.

DESCRIPTION: Relation of state and national governments, forms of state governments and politics, types of municipal governments and their operation.

**Course Outcomes**

There are no course outcomes available

POLI 317 : Public Opinion and Voting Behavior. (3-4:3:Arr.)

WHEN TAUGHT: Contact Department.
PREREQUISITE: POLI 200
RECOMMENDED: Poli 328.
DESCRIPTION: Relationship between attitudes, opinion, and voting behavior in American politics and institutions.

**Course Outcomes**

There are no course outcomes available

PWS 375 : Environmental Policies and Laws. (3:3:0)

WHEN TAUGHT: Winter
DESCRIPTION: Inception, current state, and future directions of seminal environmental policies and laws established in the US to improve environmental quality. Application of policies and laws in resource conservation and management, including a National Environmental Policy Act certification program.

**Course Outcomes**

- Demonstrate a fundamental understanding of the inception, current state, and future needs of the five seminal developments in environmental policy and law (i.e., Clean Air Act; Clean Water Act; National Environmental Policy Act; Comprehensive Environmental Response, Compensation, and Liability Act or Superfund; and the Endangered Species Act)
- Create your own conceptual framework for analyzing policy change in the United States and abroad, and understand the role of government, society, and economics in shaping this framework
- Understand the formal institutional setting in which policy is developed, the major participants involved, and the role of science in shaping policy
- Gain a basic understanding of how environmental laws (e.g., statutes, cases, and common laws) operate to regulate our interaction with the environment and one another
- Write more effectively and concisely

PWS 411 : Watershed Management. (3:3:0)

WHEN TAUGHT: Winter Even Yrs.
PREREQUISITE: BIO 350; or PWS 350
DESCRIPTION: Processes and management of the hydrologic cycle of forests and rangelands.

**Course Outcomes**

- Students will understand the history and policy that drives water management in the western US.
- Students will understand ecological and hydrological processes and concepts and apply them to watershed management actions such as harvesting, grazing, and restoration.
- Students will be able to apply assessment and classification tools to watersheds and their components to determine how management actions affect hydrologic responses.

REL C 342 : Pioneers and Persecution, 1846-1899. (2:2:0)

## Admission to Degree Program

All degree programs in the Department of Asian and Near Eastern Languages are open enrollment. Some special limitations apply for teaching minors.

## The Discipline

The many countries of Asia and the Near East are among the oldest civilizations in the world. The study of the languages and cultures of these nations gives students access to some of the richest and most varied traditions of thought, belief, and behavior to be found. A large percentage of the vast, essentially non-Christian segment of the world's population resides in these two zones: Asia—with its diverse heritage of belief in Hinduism, Buddhism, Taoism, Confucianism, and other systems of thought—continues to retain its "exotic" image for most Westerners, even though many nations in the region are at the forefront of contemporary politics and economics. The Near East, birthplace of Christianity, Judaism, and Islam, remains a little-understood, often stereotyped area of considerable economic, strategic, and religious importance today.

The languages of these regions are themselves generally difficult, with complex writing systems that require diligent study. But exposure to these languages and the cultures they express will enable students to look at the world from new perspectives and deepen their understanding of peoples whose history and practices are widely divergent from their own.

Courses in the department equip students with verbal and written facility in the languages of their chosen area, whereas linguistics courses offer an understanding of how the languages are structured and acquired. A study of the literature reveals old and sophisticated traditions no less important than that of English or any other major language.

Majors are available in Chinese, Japanese, and Korean, and a second major in Arabic. Students can obtain a minor in Arabic, Biblical Hebrew, and Modern Hebrew. Each discipline is briefly described below.

### Arabic (second major program)

Arabic study at BYU stresses facility in speaking a colloquial dialect and fluency in reading the press. The program is designed to supplement the Middle East Studies/Arabic major which prepares students for government-, agency-, and NGO-related work. The second major program, which is conceived as a supplement to the Middle East Studies/Arabic major, aims to push students' reading and speaking ability in the direction of the superior level.

### Chinese

The study of Chinese accesses the literature, thought, culture, and society of the world's largest population with the longest cultural continuum; moreover, since the civilizations of Japan, Korea, and Vietnam are founded on traditional Chinese Confucianism, a major in Chinese opens up much of the wider world of modern Asia. You will communicate in spoken and written Mandarin, gain skills in analyzing and appreciating both traditional and modern literature, acquire effective research strategies, and learn to write clearly and persuasively. All the personal enrichment and interpersonal understanding that results from a liberal arts education in the humanities is offered through the study of Chinese.

### Hebrew

The BYU Hebrew program offers courses and minor degrees in both Biblical Hebrew and Modern Hebrew. Biblical Hebrew students develop appreciation for the Hebrew Bible and competence to read prose and poetry. The program is designed to provide students with habits of study so that they may enjoy a life-long exploration of the Hebrew Bible. Students of Modern Hebrew gain access to the spoken language of the State of Israel and, through it, to Jews throughout the world. The Modern Hebrew program emphasizes the ability to speak and understand Modern Hebrew, to analyze Israeli literature and media, and to appreciate the cultural dynamics of the language.

### Japanese

The study of Japanese at the university level will provide students an opportunity to develop high level communication skills to acquire a greater understanding of Japan and its people. Additionally, students will be introduced to the rich cultural heritage of Japan in literature, thought, painting, music, and the other arts. The study of Japanese language and literature will introduce students to many of the major aspects of that heritage, while providing the kind of training in language and cultural skills that will prepare students to undertake careers in a wide variety of fields.

### Korean

Korean is a difficult language, and at BYU we emphasize reading and writing the language as well as speaking and listening. Basic course work emphasizes linguistic skill and the language's literary value and tradition.

# Career Opportunities

Students who major or minor in the languages and cultures of Asia and the Near East will find that, as will any other humanities-centered course of study, they have been well provided with tools to communicate both in the target language and in English and have broadened and deepened their knowledge of the region of their choice. Career options are many and varied for such students, but those who do not plan to continue on in the academic study of the language are strongly urged to consider a second major or a strong minor in a practical field that can be combined with their language skills. In the competitive world of today, language ability alone no longer provides the competitive advantage it once offered on the job market. Students are urged to consult the College of Humanities Advisement Center, Career Placement Services, and their academic advisors for the best ways to make use of their language as they begin to seek employment.

## Arabic

Graduates of our program find jobs in government agencies (the State Department, intelligence, the military), NGOs, and in international business. Many students use their Middle East Studies/Arabic major, or Arabic minor, as preparation for applying to MBA programs, law school, and medical or dental school.

## Chinese

Chinese majors have all of the advantages of the liberal arts graduate (who claims effective communication and interpersonal skills) with the added edge of knowing the language and culture behind a leading world economy. Therefore, graduates enter the work force in a wide variety of occupations, such as journalism, insurance, business, travel, investment, and government service. They not only are marketable as trained linguists, translators, and cultural advisors, but are vigorously recruited as personnel managers and business representatives by companies with overseas interests. Graduates are also highly competitive in applying to professional schools for medicine, dentistry, law, and business.

## Hebrew

Many students who minor in Biblical Hebrew major in Ancient Near Eastern Studies; some students continue on to earn Masters and Ph.D degrees. Eventually they are prepared to enter the academic field in a university setting, in seminary and institute programs of the Church Educational System, as independent researchers, or in related fields. Students who minor in Modern Hebrew will find the degree to be an asset if seeking jobs in government agencies (intelligence, State Department, military), international business, or the academic field.

## Japanese

In recent years, graduates from the Japanese major at BYU have gone on to law, engineering, computer, or MBA programs, while others have continued on to medical school. A few have pursued graduate work in a variety of academic fields at some of the most prestigious universities in the country. Others have gone directly to work in government service, in the military, and in American or Japanese business firms where their language ability and cultural background are in high demand. Some also pursue careers in translation or language teaching.

## Korean

Most of the jobs available for students with a Korean major are in government (NSA, CIA, FBI, etc.), but Korean majors also have all the advantages of a liberal arts degree. Many of our graduates go on to professional schools, law, business, or medicine. Korean is an excellent complement, either as a major or minor, to studies in prelaw, political science, accounting, English, international relations, and many other majors available on campus. Korean is an important language in the world of diplomacy and defense, as well as the world of international business. (Korea is the eighth largest trading partner of the U.S.) Our graduates have been hired by the U.S. government and by U.S., international, and Korean businesses. They work in technical areas as well, involving everything from computers to broadcasting to medicine.

# General Information

The Department of Asian and Near Eastern Languages strongly recommends that StDev 317, a 1-credit-hour course, be taken at the end of the sophomore year or the beginning of the junior year. Because liberal arts degrees provide preparation in a variety of useful fields rather than a single career track, this course is recommended to help liberal arts students focus on specific educational and occupational goals and to identify the career options or educational opportunities available to them. The course will introduce them to the resources needed for accessing information about graduate schools, internships, careers, and career development. Students will learn basic employment strategies, including the steps necessary for obtaining employment related to their own specialty.

# Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

College of Humanities Advisement Center
1175 JFSB, (801) 422-4789

## Admission to Program

The Digital Humanities and Technology minor degree program is open enrollment. All courses are open to all students who have met the prerequisite requirements.

## The Discipline

The Digital Humanities extends the traditional Humanities in two ways. First, it employs traditional Humanities methods to examine and present new media—from movies and television to text messages and twitter feeds—alongside traditional Humanities content. Second, it uses new, technology-based approaches to re-examine and re-present traditional Humanities content.

At Brigham Young University, the Digital Humanities field is matched with application-based technology skills training. Along with the ability to use current technology, DigHT minors develop the ability to think soundly about using current technology. The program includes a capstone experience of either a mentored research and development project or a technology-based internship.

## Career Opportunities

The Digital Humanities minor provides students of all disciplines with the narrative to describe how their university education is immediately applicable to the needs of employers. Additionally, the Digital Humanities is a current area of growth in academia, which increases demand for graduate students with technology skills.

## Program Requirements

1. Complete the following:

DIGHT 215 : Introduction to the Digital Humanities. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to the premises and practices of the Digital Humanities. Exploration of current technology used in Digital Humanities research.

**Course Outcomes**

- Students will understand Unsworth's scholarly primitives and give examples of these primitives in Humanities scholarship.
- Students will be able to evaluate the utility of new technology for use in the Humanities.
- Students will be able to propose new uses for technology based on unmet needs in the Humanities.

2. Complete 12 credit hours from the following:

DIGHT 210 : Humanities Technology: Tools & Skills. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Introduction to the skills required to create teaching and research applications in the Humanities; fundamental principles and skills of programming; principles of interface and human/computer interaction; critical problem solving.

**Course Outcomes**

- Students will be able to model the flow and structure of information between users and application.
- Students will be able to reason logically and think critically to solve basic programming problems.
- Students will understand fundamental programming concepts: sequence, conditions, loops, variables, etc.
- Students will be able to convert abstract design requirements into machine-executable code.

DIGHT 230 : Introduction to Print Publishing. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring

DESCRIPTION: Introduction to layout and typesetting and their place in the publications process; includes graphic design theory, audience analysis, and basic skills with professional desktop publishing application.

**Course Outcomes**

- Students will recognize the differences in purpose, audience, and style between various print publications.
- Students will situate typesetting and printing within the scope of the publishing process as a whole.
- Students will master the basic functions of Adobe InDesign for the purpose of typesetting various publications.
- Students will use a set of basic design principles (proximity, alignment, repetition, contrast) to improve the quality of their publications in InDesign.
- Students will be familiar with Adobe Photoshop and some of its uses in print publishing.
- Students will work effectively in groups to produce high quality printed material.

DIGHT 250 : Web Publishing. (3:3:0)

WHEN TAUGHT: Fall; Winter

DESCRIPTION: Overview and introduction to web programming as a form of expression. Includes HTML, CSS, and some JavaScript.

**Course Outcomes**

- Students will evaluate new web technologies in light of the general history of the web.
- Students will be able to draft, design, and code static web content, and then post that content to a publicly-accessible web server.
- Students will have a mastery of HTML/CSS syntax, common HTML elements/attributes/properties, and basic skill with JavaScript.

DIGHT 260 : Tools for Text Processing and Analysis. (3:3:0)

WHEN TAUGHT: Fall

PREREQUISITE: LingC 200 or C S 100 or equivalent experience.

DESCRIPTION: Introduction to tools and techniques suited for use with text analysis, including basic text encoding, text preparation, basic regular expression, and concordance programs.

**Course Outcomes**

There are no course outcomes available

DIGHT 310 : Programming in the Humanities. (3:3:0)

WHEN TAUGHT: Winter

PREREQUISITE: DigHT 210 or instructor approval.

DESCRIPTION: Intermediate topics in programming and creating teaching and research applications in the Humanities, including digital media integration, networked and mobile applications.

**Course Outcomes**

- Students will be able to reason logically and think critically to collaboratively solve significant programming problems.
- Students will understand advanced programming concepts: object orientation, data-driven applications, encapsulation, etc.
- Students will know how to integrate databases, web services, and basic server side scripting.
- Students will be able to convert abstract design requirements into machine-executable code.

DIGHT 315 : Research in the Digital Humanities. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DIGHT 215

RECOMMENDED: DigHT 260.

DESCRIPTION: Applications of computer technology to research in the Digital Humanities across language and literature, e.g. text processing, data mining, information storage and retrieval, etc.

**Course Outcomes**

There are no course outcomes available

DIGHT 330 : Print Publishing 2. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DIGHT 230

DESCRIPTION: Advanced application of digital layout and typesetting. Includes audience analysis, color theory, and photo preparation.

**Course Outcomes**

There are no course outcomes available

DIGHT 350 : Web Information Technologies. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DigHT 250 or instructor approval.

DESCRIPTION: Using advanced web applications and services to create dynamic, database-driven Web sites. Integrating database methods with web publishing approaches and principles. Techniques for Web-based Digital Humanities applications such as crowd-sourced markup, automatic data visualizations, etc.

**Course Outcomes**

- Students will be able to organize information in various electronic schemas.
- Students will be able to extract information across a variety of electronic relationships.
- Students will be able to routinize the insertion, extraction, manipulation, and reporting of information.

DIGHT 360 : (DigHT-Ling) Programming for Text Processing and Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: C S 100 or equivalent experience.

DESCRIPTION: Development of computer applications for research in language and literature (text processing, retrieval, and analysis) in one or more programming languages (e.g., Perl, Python, etc.).

**Course Outcomes**

There are no course outcomes available

DIGHT 390R : Tools Development Seminar. (1-3:Arr:Arr)

WHEN TAUGHT: Fall; Winter

PREREQUISITE: DIGHT 250; or DIGHT 260; or DIGHT 350

DESCRIPTION: Individual or group development of new technological tools with use in the Digital Humanities.

**Course Outcomes**

There are no course outcomes available

DIGHT 395R : Digital Humanities Research Seminar. (3:3:0)

WHEN TAUGHT: Fall; Winter
PREREQUISITE: DIGHT 215
RECOMMENDED: DigHT 315.
DESCRIPTION: Individual or group research of original problems in Digital Humanities research.

**Course Outcomes**

No outcomes are available at this time.

Up to 6 credits of approved 300-level or higher courses with a technology focus offered by other departments across campus.

3. Complete 3 credit hours of capstone courses:

DIGHT 495R : Digital Humanities Project. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Any DigHT 300-level course or instructor approval.
DESCRIPTION: Original research project on open questions within the Digital Humanities field. Content and/or technology advisor is required.

**Course Outcomes**

- Students will be able to draft written proposals for products/techniques they hope to develop.
- Students will be able to negotiate and meet the demands of a sponsor/client to develop technology solutions.
- Students will be able to apply their technology kills to solve a real problem they or someone else has.

DIGHT 496R : Technology Internship. (1-3:0:0)

WHEN TAUGHT: Fall; Winter; Spring
PREREQUISITE: Any DigHT 300-level course or instructor approval.
DESCRIPTION: Sponsored development of technology tools for application within the Digital Humanities (e.g. print or electronic publishing production, courseware/software development, museum/collection/textbase management, language/linguistic tools, etc.). Approval by project sponsor, DigHT Coordinator, and BYU Internship Office are required.

**Course Outcomes**

- Students will be able to complete tasks related to DHT skills in a professional environment.
- Students will be able to apply at least one DHT-related technology at a professional level.
- Student will be able to demonstrate professional traits such as promptness, positive demeanor, well-spokenness, etc.

A project/internship/capstone course in the student's major involving substantial computer work may also be used. See the DigHT coordinator for details.

## Admission to Degree Program

All degree programs in the Department of English are open enrollment. However, special enrollment limitations apply for English teaching majors.

## The Discipline

The English major provides a detailed knowledge of the English language and of literature written in English. English majors approach language and literature as a source of knowledge and aesthetic pleasure, a mode of encountering and evaluating diverse minds and attitudes, a vehicle for art and action, a means of historical understanding, and a source of spiritual insight. English majors use writing as their primary means (1) of knowing, understanding, and evaluating their experience and their reading and (2) of sharing their insight with others. In keeping with the long-standing ideals of a liberal arts education, the English Department aims to cultivate in its students those foundational skills in writing, awareness, and judgment upon which lives of wisdom, service, and an ever-increasing love for learning might be built.

## Career Opportunities

With a firm grounding in the liberal arts, English majors are prepared for any career that requires perceptive reading, orderly and clear thinking, intellectual maturity, and effective writing. Many career opportunities for English majors exist in teaching, professional writing and editing, law, business, communications, or government service. English majors can certify to teach secondary-school English, or they can prepare for graduate study in English and college teaching. When combined with prerequisite courses in other departments, the English major provides excellent preparation for graduate work in law, business, library science, medicine, humanities, or religion. By selecting areas of concentration, some English majors prepare for careers in technical and professional communication, editing, creative writing, and related fields. By supplementing their English major with computer classes, some find work in information technology. The skills and knowledge acquired by an English major also provide good preparation for government service, especially when combined with the study of foreign languages, economics, political science, and history.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- Earn a minimum of 120 credit hours
- Have a cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

## Undergraduate Programs and Degrees

## General Information

The Department of English strongly recommends that StDev 317, a 1-credit-hour course, be taken at the end of the sophomore year or the beginning of the junior year. Because liberal arts degrees provide preparation in a variety of useful fields rather than a single career track, this course is recommended to help liberal arts students focus on specific educational and occupational goals and to identify the career options or educational opportunities available to them. The course will introduce them to the resources needed for accessing information about graduate schools, internships, careers, and career development. Students will learn basic employment strategies, including the steps necessary for obtaining employment related to their own specialty.

*This is a limited-enrollment program requiring departmental admissions approval. Please see item 1 below for information regarding admission to this program.*

*This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 350 MCKB, (801) 422-3426.*

## Program Requirements | View MAP | View Program Outcomes

1. This is a closed major requiring application to the program. Application forms are available in the Humanities Advisement Center (1175 JFSB) and the English Education Office (4168 JFSB). Students cannot apply until they have completed at least 9 hours of English major core courses.
2. Students must complete the GE Foreign Language option* even if the Advanced Mathematics option has already been completed.
3. The English Department requires a minimum of 24 hours of English major course work to be taken in residency at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
4. Grades below C- in professional education courses or content courses will not be accepted in the teaching major or teaching minor. Teacher candidates must have a cumulative 2.85 GPA in teaching major and teaching minor courses to qualify for student teaching.
5. Engl 195 is recommended.
6. Because upper-division English courses require substantial writing, students should complete their Engl 295 before they begin their first upper-division courses, preferably in the second semester of their sophomore year.
7. A teaching minor is not required for licensure. However, it is strongly recommended.
8. Engl 276R is prerequisite to Engl 329, 377, 378, 379, and 423. All are prerequisite to Engl 476R.
9. Complete the following core requirements:
   - Because English is a writing-intensive major, students are strongly encouraged to take a first-year freshman college-level writing course regardless of their AP test scores (Wrtg 150 or Phil 150).
   - Fundamentals of language and literature: complete the following:

     ENGL 251 : Introduction to English Studies. (3:3:0)

## Undergraduate Courses

**100-Level Courses**

WRTG 150 : Writing and Rhetoric. (3:3:0)

OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Processes of writing, reading, and research with an emphasis on argumentation and rhetorical analysis.
NOTE: Fulfills General Education First-Year Writing requirement.

**Course Outcomes**

- Use rhetoric responsibly to compose arguments in a variety of genres for specific audiences and purposes.
- Critically read texts. This includesanalyzing how a text functions in a specific situation, community, or public;analyzing the nuances of language (diction, figures of speech, tone, etc.);identifying and evaluating the elements of an argument—claims, reasons, assumptions, and ethical, emotional, and logical appeals.
- Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.
- Use style—diction, figurative language, tone, grammar, punctuation, spelling, mechanics—genre, conventions, and document design correctly and for rhetorical effect.
- Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

## Admission to Degree Program

All degree programs in the Department of French and Italian are open enrollment.

## The Discipline

The study of French or Italian language and literature sharpens analytical and communicative skills useful in a myriad of professional contexts. Students develop proficiency in listening, reading, writing, and speaking, and they learn to use literature as a means to deepen their understanding of culturally specific as well as universal issues and values.

## Career Opportunities

Italian and French are valuable research and communication tools for students in music, art, history, European studies, international relations, library science, and comparative literature. Many have chosen a major or minor in Italian or French in addition to a second major or minor in an area such as accounting or business management, or as preparation for professional programs in public administration, business administration, organizational behavior, dentistry, law, or medicine.

Many of our students have opted for a career in government service, working with an embassy, the State Department, the CIA, and other government agencies.

Other students have gone into travel and tourism, working with tour agencies, airlines, major hotel chains, or resort communities.

The computer industry also provides employment opportunity for our graduates. Many computer companies have expanded into foreign markets and hire people who can translate computer and software instruction and sales publications in a foreign language.

## Graduation Requirements

To receive a BYU bachelor's degree a student must complete, in addition to all requirements for a specific major, the following university requirements:

- The university core, consisting of requirements in general and religious education. (See University Core for details. For a complete listing of courses that meet university core requirements, see the current class schedule.)
- At least 30 credit hours must be earned in residence on the BYU campus in Provo as an admitted day student
- A minimum of 120 credit hours
- A cumulative GPA of at least 2.0
- Be in good standing with the Honor Code Office

## Graduate Programs and Degrees

MA in French Studies

For more information see the BYU 2014–2015 Graduate Catalog.

## General Information

The Department of French and Italian strongly recommends that StDev 317, a 1-credit-hour course, be taken at the end of the

sophomore year or the beginning of the junior year. Because liberal arts degrees provide preparation in a variety of useful fields rather than a single career track, this course is recommended to help liberal arts students focus on specific educational and occupational goals and to identify the career options or educational opportunities available to them. The course will introduce them to the resources needed for accessing information about graduate schools, internships, careers, and career development. Students will learn basic employment strategies, including the steps necessary for obtaining employment related to their own specialty.

**Internships Abroad.** The Department of French and Italian in association with the French Embassy's Cultural Services and the Dante Alighieri School in Siena, Italy offers spring/summer internships in France and Italy in a variety of positions: businesses, corporations, industry, hospitals, research laboratories, national and local governments, cultural organizations, nonprofit agencies and nongovernmental organizations, hotels and tourism, etc. Job placements are made according to the student's language proficiency, previous work experience, field of study, and personal interest. Students may enroll for Fren and Ital 399R, 211R, 311R, or 411R, or other courses such as Fren 490R. The internship proves invaluable in strengthening language skills.

**Oral Proficiency Interview.** All French-teaching majors and minors and all Italian majors are required to enroll in Fren 491 or Ital 491 and have an oral proficiency interview (OPI). French studies majors and French majors are required to take the OPI as part of the requirements for Fren 495. French teaching majors and minors are required to take the OPI before taking Fren 378. The minimum rating of *Advanced* is required of all *teaching* majors and minors. Appointments for the interviews are made through the department secretary. French students are strongly encouraged to complete Fren 411R prior to taking the OPI.

When it is necessary to strengthen oral proficiency, students are encouraged to take conversation courses. They should also take advantage of Foreign Language Housing, Study Abroad programs, summer internships abroad, and support materials in the Humanities Learning Resource Center, such as CDs, videos, and satellite broadcasts. The department strongly encourages all majors to complete an internship prior to graduation.

**Instruction.** All courses are taught in the target language unless indicated otherwise in this catalog.

## General Information

**Language Credit by Examination.** A student enrolled full-time at BYU whose native language is not French may receive credit by special examination for French for which he or she has acquired the equivalent skill or knowledge. However, this is possible only if no university credit has been given through AP, CLEP, or transfer of equivalent credit from another university or other institutions.

The French Language for Credit Examination is administered by the French and Italian Department twice a year: in November during fall semester and in March during winter semester. Based on enrollment, the credit examination may be administered during spring and/or summer terms. Details about this examination will be given by the student's Fren 201, 202, or 321 teacher. Please note that students can test out of classes as follows, depending on a student's status:

*Students who start with French 201 can test out of:*

Fren 101 and 102 (8 hours).

*Returned missionaries from Quebec or Creole-speaking missions, etc., who start with Fren 201 can test out of:*

Fren 101, 102, and 211R (10 hours)

For returned missionaries to be eligible to take the exam, they need to be enrolled in Fren 201.

*Returned missionaries from France, Belgium, Switzerland, etc., can test out of:*

Fren 101, 102, 201, 211R, and 311R (16 hours)

For returned missionaries to be eligible to take the exam, they need to be enrolled in Fren 321.

**Note 1:** The above five classes are *not* part of a French major or minor. The first French minor class requirement is Fren 321.

**Note 2:** Fren 340 fulfills the GE Foreign Language option for returned missionaries from France, Belgium, Switzerland and other French-speaking countries. Fren 321 does not.

**Accelerated Program.** The department offers an accelerated course in beginning French (101 and 102) every fall and winter semester. These courses are offered on the term.

**Foreign Language Student Residence.** An excellent alternative to or preparation for foreign residency is offered through the Foreign Language Student Residence, where participants speak, eat, and live with a *French only* rule. This program, with numerous cultural opportunities, is available each semester to women and men who have completed at least one year of college French. Residents may also receive 2 hours of conversation credit per semester by enrolling in a specially designated section of 211R or 311R.

**Study Abroad Programs.** All students of French are encouraged to participate in a Study Abroad program. Study Abroad typically offers during spring and/or summer terms a language and civilization program in Paris, France. It provides an excellent opportunity for developing language proficiency and better understanding of the history and culture of France. Study Abroad also offers a semester-long program in Paris emphasizing general education courses.

## Program Requirements | View MAP | View Program Outcomes

1. The French and Italian Department requires a minimum of 15 major hours to be taken in residence at BYU for this degree program. These hours may also go toward BYU's 30-hour residency requirement for graduation.
2. Complete a minor (approximately 16–21 hours) or 15 hours of course work in an area approved by the major advisor. Courses must be approved before the senior year.
3. Complete the following prerequisites (or equivalent):

FREN 101 : First-Year French, Part 1. (4:5:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
DESCRIPTION: Development of the four language skills: understanding, speaking, reading, and writing.

**Course Outcomes**
- Comprehend French as you hear and read authentic language relating to familiar topics.
- Speak French well enough to satisfy immediate needs. (You will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)
- Write short messages and well-articulated sentences in French on familiar topics.

FREN 102 : First-Year French, Part 2. (4:5:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Fren 101 or equivalent.
DESCRIPTION: Continuation of French 101.

**Course Outcomes**
- Write well-articulated sentences and loosely connected texts related to personal experiences and common events.
- Comprehend French as you hear and read authentic language relating to familiar topics.
- Speak French well enough to handle a variety of simple communicative tasks in basic social situations. You will be able to meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.

FREN 201 : Intermediate French, Part 1. (4:5:2)
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Fren 102 or equivalent.
DESCRIPTION: Reading, writing, conversation, vocabulary building, and review of grammar.

**Course Outcomes**
- Improve your ability to use French in real-life situations and for real-life purposes.
- Create elaborated utterances and group them into paragraphs and narratives.
- Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).
- Review and increase understanding of basic language structures.
- Discuss in French selected current events and various francophone regions of the world and some of their cultural practices.

FREN 202 : Intermediate French, Part 2. (3:3:1)
OFFERED: Honors also.
WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: Fren 201 or equivalent.
DESCRIPTION: Final course for GE Languages of Learning requirement (except for full-time French speaking returned missionaries); extensive reading in French literature and culture.
NOTE: This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.

**Course Outcomes**
- Read beyond basic plot and learn to apply tools of literary analysis.

Recognize and analyze key genres in French literature.
- Identify and define key characteristics of the important French literary movements.
- Place literature in a meaningful cultural and historical context.
- Improve your reading and writing skills in French.
- Broaden and deepen your perception and appreciation of French culture.

4. Complete the following core courses:

FREN 321 : Advanced French Part 1. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Fren 202 or equivalent.
DESCRIPTION: Grammar and composition, listening and speaking skills.

**Course Outcomes**

- Students will develop their ability to narrate and describe in the present and past time frames, use connected discourse, and learn to manage complications in the language through communicative strategies, without patterns of breakdown.
- Students will analyze and employ proper grammatical, lexical, phonological and stylistic features of Advanced-level French in descriptive and narrative texts.

FREN 322 : Advanced French Part 2. (3:3:1)

WHEN TAUGHT: Fall; Winter; Spring; Summer
PREREQUISITE: FREN 321
DESCRIPTION: Grammar and composition, listening and speaking skills.

**Course Outcomes**

- Students will solidify their ability to narrate and describe in present, past and future time frames, use connected discourse, and manage complications in the language through communicative strategies, without patterns of breakdown.
- Students will develop partial control of their ability to support their opinions and hypothesize about abstract topics, in the context of extended discourse.
- Students will analyze and employ proper grammatical, lexical, phonological and stylistic features of Advanced-level French language in summaries, detailed descriptions and narrations, analyses and argumentative essays

FREN 340 : Introduction to Literary Analysis. (3:3:0)

WHEN TAUGHT: Fall; Winter; Spring; Summer
RECOMMENDED: Fren 321 or concurrent enrollment.
DESCRIPTION: How to read French prose, drama, and poetry and apply methods of literary criticism.
NOTE: Capstone course for GE Languages of Learning requirement for returned missionaries

**Course Outcomes**

- Contextualize and analyze French literature of various periods and genres.
- Write analytically about the literature in well-formatted essays.
